SAFETY DATA SHEET

## 1. Product Identification

| Product name | SB-112 Hardener, Part B |
| :---: | :---: |
| SDS Number | 0400B00 |
| Product type | Polyamine mixture |
| Recommended use of the chemical and restrictions on use | Directed at, but not limited to, the laminating and coating of fiber reinforced composites and wood. |
| Restrictions | None known. |
| Manufacturer/Supplier information |  |
| Company name | SYSTEM THREE RESINS, INC. |
| Address | 8517 Commerce Place Dr NE |
|  | Lacey, WA 98516 |
|  | United States |
| Telephone | 1-253-333-8118 |
| Website | www.systemthree.com |
| Email | support@systemthree.com |
| Emergency Contact | CHEMTEL (U.S. and CANADA) 1-800-704-9215 |
|  | CHEMTEL (Outside the U.S.) - Call Collect accepted +1-360-256-7365 |

## 2. Hazard(s) Identification

| Classification of substance or <br> mixture/Signal Word | DANGER <br> Acute Toxicity (oral, dermal) - Category 4 <br> Skin Corrosion/Irritation - Category 1 <br> Serious Eye Damage/Eye Irritation - Category 1 <br> Skin Sensitization - Category 1 |
| :--- | :--- |
| Toxic to Reproduction [Fertility, Unborn child]- Category 1 |  |

P272 Contaminated work clothing should not be allowed out of the workplace.
P273 Avoid release to the environment.
P280 Wear protective gloves. Wear eye or face protection.
Response
P310 Immediately call a POISON CENTER or doctor/physician.
P301+330+331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P302+352+363 IF ON SKIN: Wash with soap and water. Take off contaminated clothing and wash before reuse.
P304+340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305+351+338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. P333+313 If skin irritation or rash occurs: Get medical
advice/attention.
Storage
Disposal

Hazards not otherwise classified (HNOC)
P405 Store locked up.
P501 Dispose of contents and container in accordance with all local, regional, national and international regulations.

None available.

## 3. Composition/Information On Ingredients

| Chemical Name | CAS Number | Content (\%) |
| :--- | :--- | :--- |
| Cycloaliphatic Amine Adduct | Trade Secret | $50-60 \%$ |
| Aliphatic Amine Adduct | Trade Secret | $30-40 \%$ |
| Polyoxypropylenediamine | $9046-10-0$ | $10-15 \%$ |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

## 4. First-Aid Measures

## Skin contact

## Eye contact

## Ingestion

Immediately remove contaminated clothing, and any extraneous chemical, if possible to do so without delay. Flush immediately with copious amounts of water. Initiate and maintain continuous irrigation until the patient receives medical care. If medical care is not promptly available, continue to irrigate for one hour. Cover wound with sterile dressing.

Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.

Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting without medical advice. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain open airway. Loosed tight clothing such as a collar, tie, belt, or waistband.

Move to fresh air.

Notes to physician

Specific treatments

Symptomatic and supportive therapy as needed. Following severe exposure medical follow-up should be monitored for at least 48 hours.

No specific treatment.

## 5. Fire-Fighting Measures

Suitable extinguishing media
Unsuitable extinguishing media
Specific hazards arising from the chemical

Hazardous decomposition products

Special protective actions for fire-fighters

Special protective equipment for firefighters

Further information

Alcohol-resistant foam.
Carbon dioxide $\left(\mathrm{CO}_{2}\right)$.
Dry chemical
Water Fog
None known.
May generate ammonia gas. May generate toxic nitrogen oxide gases. Use of water may result in the formation of very toxic aqueous solutions. Do not allow run-off from firefighting to enter drains or water courses. Incomplete combustion may form carbon monoxide. Downwind personnel must be evacuated. Burning produces noxious and toxic fumes.
Decomposition products may include the following materials:
Carbon dioxide
Carbon monoxide
Nitrogen oxides
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Do not allow run-off from firefighting to enter drains or water courses. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

## 6. Accidental Release Measures

## Personal precautions

## Emergency procedures

Methods and materials for containment/cleanup

## Environmental precautions

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Wear proper protective clothing, gloves and eye/face protection.
If material is spilled, avoid contact with material. Persons not wearing appropriate protective equipment should leave the area of the spill until cleanup is complete.
Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## 7. Handling and Storage

Precautions for safe handling<br>Precautions/Recommendations for safe/proper storage

Put on appropriate personal protective equipment. Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid contact with skin and eyes. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. When using, do not eat, drink or smoke. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## 8. Exposure Controls/Personal Protection

## Occupational Exposure Limits

Appropriate engineering controls

## Environmental exposure controls

None established.
Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Do not allow spill to enter sewers or waterways.

Splash-proof goggles or safety spectacles with side shields are recommended. Always wear eye protection when sanding cured epoxy resins to avoid dust in eyes.

Always wear impervious gloves: butyl rubber, nitrile rubber, Neoprene, PVC disposable gloves,

Wear clean, body-covering clothing to avoid skin contact.
Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Wear gloves at all times when handling product, avoid direct contact with skin. When finished using product, dispose of gloves properly and wash hands with warm, soapy water.

## 9. Physical and Chemical Properties

| Chemical family | Amine Curing Agent |
| :--- | :--- |
| Appearance | Clear liquid |
| Physical State |  |
| Form | Pourable liquid |
| Odor | Very light yellow |
| Density (Specific Gravity) | Ammoniacal |
| Viscosity | 8.65 lb/gal (1.04) |
| pH | 2200 CPS @ $77^{\circ} \mathrm{F}\left(25^{\circ} \mathrm{C}\right)$ |
| Melting point/freezing point | Alkaline |
| Initial boiling point and boiling range | $\mathrm{N} / \mathrm{A}$ |
| Flash point | $\mathrm{N} / \mathrm{A}$ |
| Evaporation rate | $\mathrm{N} / \mathrm{A}$ |
| Flammability (solid, gas) | Slower than ether |
| Upper/lower flammability limit (by volume) | $\mathrm{N} / \mathrm{A}$ |
| Material voc | $\mathrm{N} / \mathrm{A}$ |
| Vapor density | Heavier than air |
| Relative density | $\mathrm{N} / \mathrm{A}$ |
| Solubility in water | Very slight in water |
| Partition coefficient: n -octanol/water | $\mathrm{N} / \mathrm{A}$ |
| Auto-ignition temperature | $\mathrm{N} / \mathrm{A}$ |
| Decomposition temperature | $\mathrm{N} / \mathrm{A}$ |

## 10.Stability and Reactivity

| Reactivity | Stable under normal conditions. |
| :--- | :--- |
| Chemical Stability | The product is stable. |
| Possibility of hazardous reactions | Under normal conditions of storage and use, hazardous reactions will not <br> occur. |
| Conditions to avoid | Epoxy resins and epoxy resin hardeners react with each other producing heat. <br> They should not be mixed with each other under uncontrolled conditions or in <br> a large mass as the ensuing exotherm may result in heat and smoke. |
| Incompatible materials | Strong oxidizing agents and mineral acids. |
| Hazardous decomposition products | Oxides of carbon, nitrogen. |
| Other hazards | None known. |

## 11. Toxicological Information

Acute Health Hazard (components)
No comprehensive data (ingestion, inhalation, dermal) on mixture (product).

| Component | Result | Species | Dose | Exposure |
| :--- | :--- | :--- | :--- | :--- |
| Polyoxypropylenediamine | LD50 Oral | Rat | $2,885.3 \mathrm{mg} / \mathrm{kg}$ | - |

|  | LC50 Inhalation | Rat | $>0.74 \mathrm{mg} / \mathrm{l}$ | 8 h |
| :--- | :--- | :--- | :--- | :--- |
|  | LD50 Dermal | Rabbit | $2,979.7 \mathrm{mg} / \mathrm{kg}$ | - |

Irritation/Corrosion (components) Classifies as Skin Corrosion Category 1 per positive Corrositex Dermal Testing. Classifies as Serious Eye Damage Category 1 per GHS calculations.

| Component | Result | Species | Test | Exposure |
| :---: | :---: | :---: | :---: | :---: |
| Polyoxypropylenediamine | Skin-Corrosive | Rabbit | - | 1-4 h |
|  | Eye-Corrosive | Rabbit | OECD Test Guideline 405 | - |
| Sensitization No information on product itself. | No information on product itself. |  |  |  |
| Mutagenicity |  | No information on product itself. |  |  |
| Carcinogenicity |  | No information on product itself. |  |  |
| Reproductive Toxicity |  | No information on product itself. |  |  |
| Teratogenicity |  | No information on product itself. |  |  |
| Specific target organ toxicity (single exposure) |  | No information on product itself. |  |  |
| Specific target organ toxicity (repeated exposure) |  | No information on product itself. |  |  |
| Aspiration hazard |  | No information on product itself. |  |  |

## Potential acute health effects

Eye Contact
Inhalation
Skin Contact
Ingestion
Symptoms related to the physical, chemical and toxicological characteristics Eye Contact

Inhalation

Skin Contact

Ingestion

Delayed and immediate effects and also chronic effects from short and long term exposure
Potential chronic health effects
General

## Carcinogenicity

Mutagenicity

Causes serious eye damage.
No data available.
Causes severe burns. May cause an allergic skin reaction.
Harmful if swallowed. May cause burns to mouth, throat, and stomach.

Adverse symptoms may include the following:
Pain
Watering
Redness
Adverse symptoms may include the following:
Wheezing and breathing difficulties
Asthma
Adverse symptoms may include the following:
Pain or irritation
Redness
Blistering may occur
Adverse symptoms may include the following:
Stomach pains
No information on product itself.

Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

No known significant effects or critical hazards.
No known significant effects or critical hazards.

| Teratogenicity | No known significant effects or critical hazards. |
| :--- | :--- |
| Developmental effects | No known significant effects or critical hazards. |
| Fertility effects | No known significant effects or critical hazards. |

## Numerical measures of toxicity

Acute toxicity estimates (ATEmix)

| Route | ATE value |
| :--- | :--- |
| Oral | $1336.8 \mathrm{mg} / \mathrm{kg}$ |
| Dermal | $1634.4 \mathrm{mg} / \mathrm{kg}$ |
| Inhalation (vapors) | - |

## 12. Ecological Information

## Ecotoxicity

No comprehensive data available on product itself.

| Component | Test <br> Endpoint | Species | Results | Exposure |
| :--- | :--- | :--- | :--- | :--- |
| Polyoxypropylenediamine | Acute EC50: OECD 203 Fish, <br> Acute Toxicity Test | Fish | $>15 \mathrm{mg} / \mathrm{l}$ | 96 h Semi-static |
|  | Acute EC50: OECD 203 Fish, <br> Acute Toxicity Test | Fish | $772.14 \mathrm{mg} / \mathrm{l}$ | 96 h Static |
|  | Chronic NOEC: OECD 201 <br> Alga, Growth Inhibition Test | Algae | $0.32 \mathrm{mg} / \mathrm{l}$ | 72 h Static |

Persistence and degradability No information on product itself.

| Component | Test | Period | Result |
| :--- | :--- | :--- | :--- |
| Polyoxypropylenediamine | OECD 301B Ready Biodegradability - CO2 <br> Evolution Test | 28 days | $0 \%$ |

## Bioaccumulative Potential

No information on product itself.

| Component | LogPow | BCF | Potential |
| :--- | :--- | :--- | :--- |
| Polyoxypropylenediamine | 1.34 | - | low |

## Mobility in Soil

Soil/water partition coefficient (KOC) No information on product itself.
Other adverse effects
No known significant effects or critical hazards.

## 13. Disposal Considerations

Waste from residues/ unused products

Contaminated packaging

Product should not be allowed to enter drains, water courses or the soil; dispose of this material and its containers in a safe way. Contact supplier if guidance is required.

Dispose of container and unused contents in accordance with federal, state and local requirements.

## 14.Transport Information

The data provided in this section is for information only and may not be specific to your package size or mode of transport. You will need to apply the appropriate regulations to properly classify your shipment for transportation.

International Transport Regulations

| Regulatory information | UN/NA number | Proper Shipping Name | Classes/*PG | Additional Information |
| :---: | :---: | :---: | :---: | :---: |
| DOT | UN2735 | Amines, liquid, corrosive, n.o.s. (polyoxypropylenediamine) | Class 8 III |  |
| TDG | UN2735 | Amines, liquid, corrosive, n.o.s. (polyoxypropylenediamine) | Class 8 III |  |
| IMO/IMDG | UN2735 | Amines, liquid, corrosive, n.o.s. (polyoxypropylenediamine) | Class 8 III |  |
| IATA | UN2735 | Amines, liquid, corrosive, n.o.s. (polyoxypropylenediamine) | Class 8 III |  |
| *PG: Packing group |  |  |  |  |
| Special precautions for user: |  | Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage. |  |  |
