

# 1

We start with planning the arrangement of wallpaper strips on the wall, here please put the wallpaper against the wall and check, whether the wallpaper will fully cover a selected wall fragment.

WE RECOMMEND GLUES WITH A LIQUID CONSISTENCY, NOT POWDER. THIS WAY WE WILL ELIMINATE THE RISK OF LUMP FORMATION.

# 2

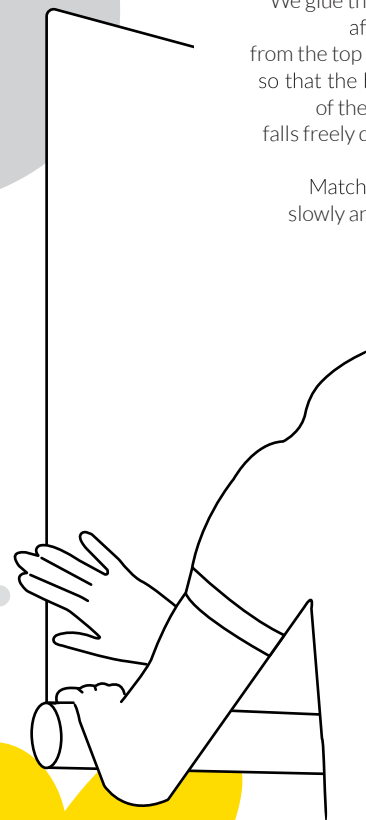

Apply the glue slowly ON THE WALL, on an area slightly larger than the applied strip of wallpaper (if the instructions for using the glue say otherwise, please follow the instruction). Remember to spread glue evenly.

# 3

We glue the belts one after another, from the top of the wall, so that the bottom part of the glued strip falls freely downwards.

Match the pattern slowly and precisely.

## HOW TO APPLY A WALLPAPER

### DEKORNIK

Here is a short instruction on how to apply our wallpaper - step by step. Let's start!

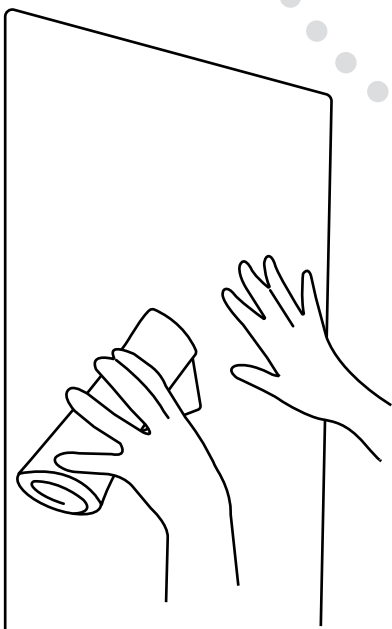

# 4

Finally, after applying all the strips, gently press the wallpaper with a soft and dry (rolled) cloth. Do not rub the wallpaper several times in the same place, it might damage it.

If excess glue comes out between the strips, please wipe it up gently with a towel paper or cloth.

Excess wallpaper (length or width) slowly cut with a sharp paper knife.

IF SOME BUBBLES APPEAR UNDER THE SURFACE OF THE WALLPAPER, SLOWLY PULL THEM OUT WITH A SPECIAL ROLLER OR A CLOTH.

If you find anything unclear, please call or write to us immediately. We are always happy to help and explain everything.

# DEKORNIK

**BEFORE APPLYING OUR WALLPAPER, PLEASE READ THESE 6 POINTS BELOW:**

Non-woven paper (on which we print wallpapers) it is not self-adhesive and for installation you should use wallpaper glue - a special wallpaper glue with a backing non-woven fabric. You can buy in every DIY store.

We recommend the already mixed ones with the consistency of cream and not powder.

Please carefully **prime the wall** and clean the surface from dust or grease.

Wallpapers can be applied on the walls only **after approx. 21 days** from the last painting, otherwise the glue will not be as strong as it should and the wallpaper can get peel off or fold slightly.

Before applying the wallpaper, **check that it is not damaged and there are no other visible defects.**

Please spread the strips on a flat surface - e.g. on the floor - and see if the pattern fits and whether the colors are just as beautiful on each lane.

50cm

**We print wallpapers in strips 50 or 100 cm wide**

(depending on design), and they perfectly match themselves. Just apply one strip next to the other, with a tangent line (strips do not overlap on yourself).

100cm

And please remember - colors on monitors or smartphones differ a little bit from those printed.

Each display is calibrated differently, has a different brightness and saturation scale.

We know our wallpapers are printed in the most beautiful color scale possible!
