## Seismic Compliant Cable Supports

Tested in accordance with ANSI/ASHRAE 171-2017  
to comply with AS1170.4

# Independently Certified for Seismic Compliance

Cable support systems by Blitz Systems are independently tested and certified compliant for bracing and securing suspended non-structural equipment and components (HVAC duct, conduit/cable tray, electrical, data and piping) within buildings, in accordance with ANSI/ASHRAE 171-2017 to comply with AS1170.4 for earthquake actions in Australia.

Blitz Systems offer a turnkey solution for seismic compliance including commercial buildings, healthcare facilities, manufacturing, government buildings, educational institutions, corporate offices, data centres and infrastructure projects across Australia and New Zealand, for both new and existing builds.

Suspended non-structural building components are critical for the proper functioning and safety of a building, and non-compliant installations can equate to a high percentage of a building's damage caused by earthquakes/seismic events.

**REDUCE  
INSTALL  
TIME** | by over  
**50%**

**Gain compliance peace-of-mind with Blitz's industry-leading, seismic cable and HVAC support systems.**

Reduce installation time by more than half, minimise onsite labour costs, reduce materials and waste, reduce supply expenses, and eliminate onsite frustrations.

Unlike traditional trapeze or suspending mechanical and electrical service cable supports that rely on nuts and bolts, all Blitz Systems rely on modular gripper patented designs that streamline installation for new and existing infrastructure.

Independent test results reveal Blitz Cable Supports have a high suspension capacity of up to 50kg per lineal metre and are also certified for fire-rated compliance per Australia Standard AS/NZS3013:2005 Electrical installations - Classification of the fire and mechanical performance of wiring system elements.

Blitz cable supports are a preferred system for commercial construction projects requiring cable supports for commercial electrical, data networks, HVAC and mechanical installations requiring seismic and fire-rated compliance.

**Blitz Systems was formed to help the construction industry save time and money. We're on a mission to change the game by developing systems that boost efficiency and productivity, or "Blitz It" as we like to call it.**

## Contact Us

We'd love to hear from you! If you have any questions, inquiries, or feedback regarding seismic and fire-rated cable supports, feel free to get in touch with us using the information below. Our dedicated team is here to assist you in any way we can.
