MATERIALS

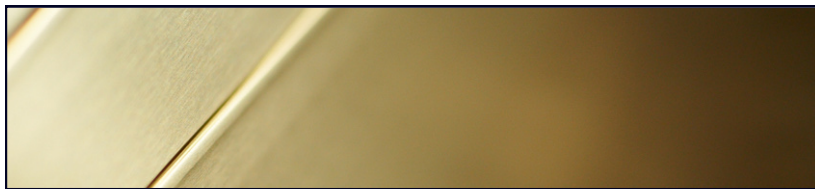

Brass

This product contains accent details made from solid brass.

Brass is composed of the alloys copper and zinc, and will develop a patina over time due to chemical reactions between these elements and the environment.

The color of solid brass will vary with the thickness of each accent piece, as well as the specific composition of the copper and zinc alloys in the base metal.

As such, color variations between accent pieces are therefore to be expected and are not a defect in workmanship or materials.

BRASS IS SUSCEPTIBLE TO SCRATCHING. DO NOT APPLY AN ABRASIVE CLEANING AGENT AND ONLY USE A SOFT CLOTH WHEN CLEANING.

THE BRASS IS LACQUER SEALED. OVER A PERIOD OF TIME SOME COLOR VARIATION AND A SLIGHT PATINA EFFECT WILL NEVERTHELESS OCCUR. THE LACQUER SEAL IS FOR INDOOR USE ONLY. ANY EXPOSURE TO SUN AND OUTDOOR WEATHER ELEMENTS MAY COMPROMISE THE LACQUER SEAL.
