

Instructions for K-MAX LED KIT FOR 30 L TOPCASE
SKU# 0400-1071

Step 1:
Pull off plug located on the bottom of your K-Max 30 Liter Topcase.

Step 2:
Drill hole in the base center. A dremel is very helpful in order to clean up hole to the proper size. Make sure to be very careful not to drill/dremel hole too large.

Step 3:
Feed LED strips through the hole and set inside topcase.

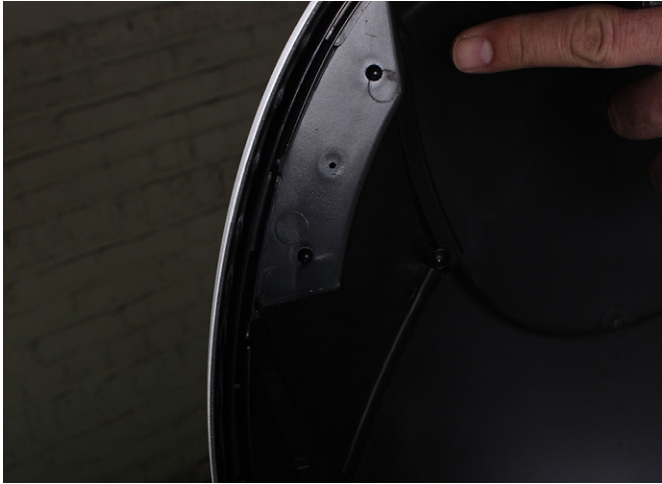

Step 3: (Continued)
LED Connector should snap into place.

Step 4:
Fold over molded in plastic tab and screw down with provided screw.

Step 5:
Remove screws on both sides. Remove reflectors on both sides of the topcase.

Step 6:
Locate access port underneath the reflectors

Step 7:
Fit LED strips through the access slot, right side and left side accordingly.

Step 8:
Screw down LED strips to preformed location.

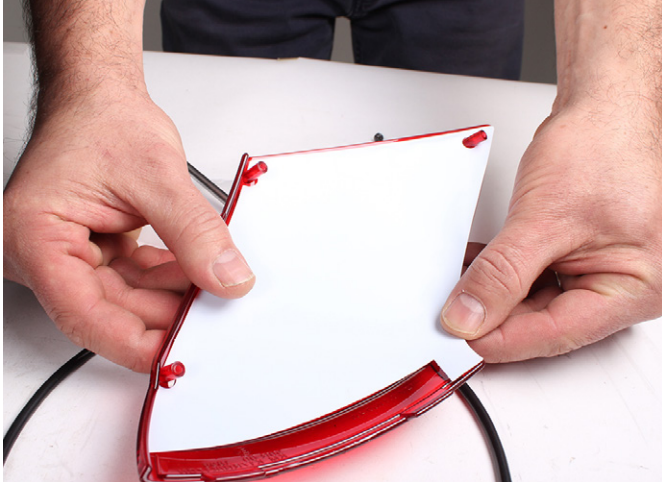

Step 9:
Fit wires into pre-existing groove channels and run them down to the drilled hole.

Step 9: (Continued)

Fit wires into pre-existing groove channels and run them down to the drilled hole.

Step 10:

Tear off serrated portion of reflector to accommodate LED strips.

Step 11:

Re-install reflector and lens sets.

Step 12:
