

Remove the original rear rail. Please keep the nuts.

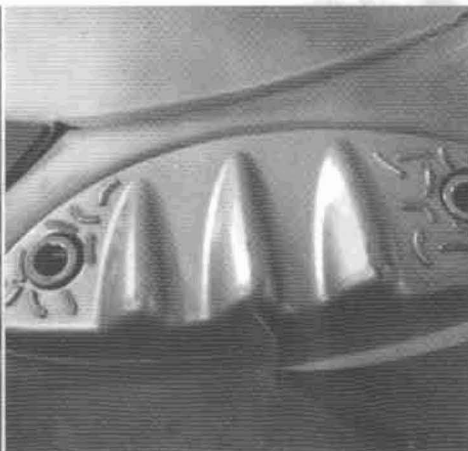

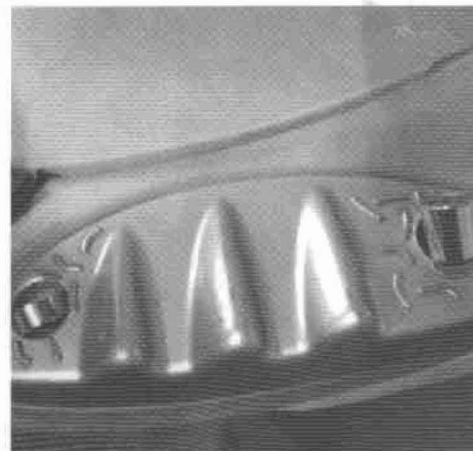

Note everything that comes with cowl protectors: one set right and left cowl protectors, one footrest, 4 longer bolts, 4 washers, 2 shorter spacers, 2 longer spacers, and 1 black sleeve.

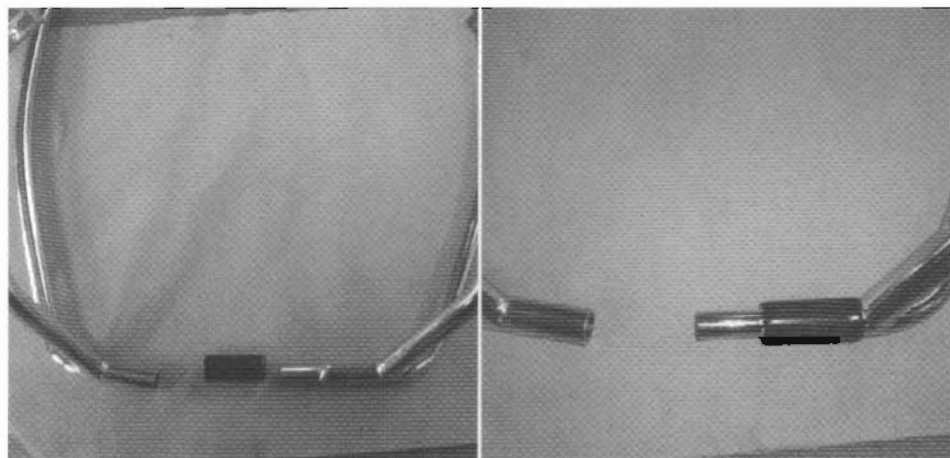

Remove the bolts from the scooter's footrests.

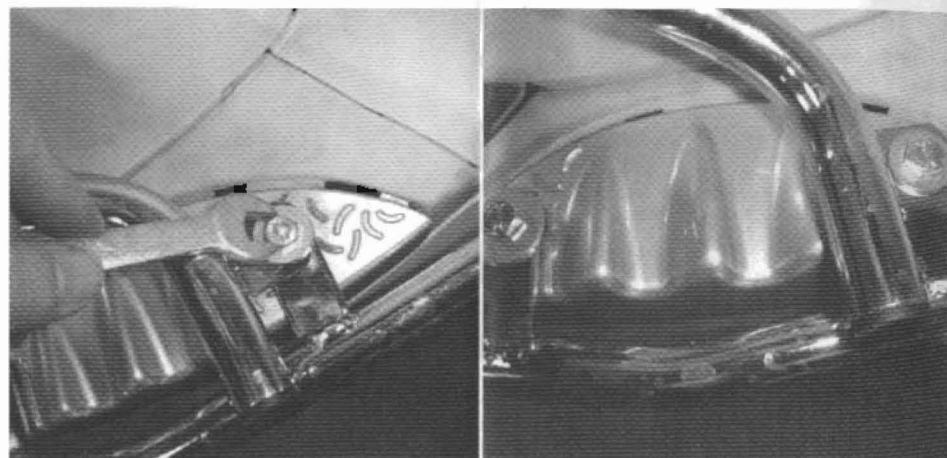

Note the spare parts that come with the Buddy rear rack: 2 longer bolts and 1 spacer. Put the spacer on the rear stud.

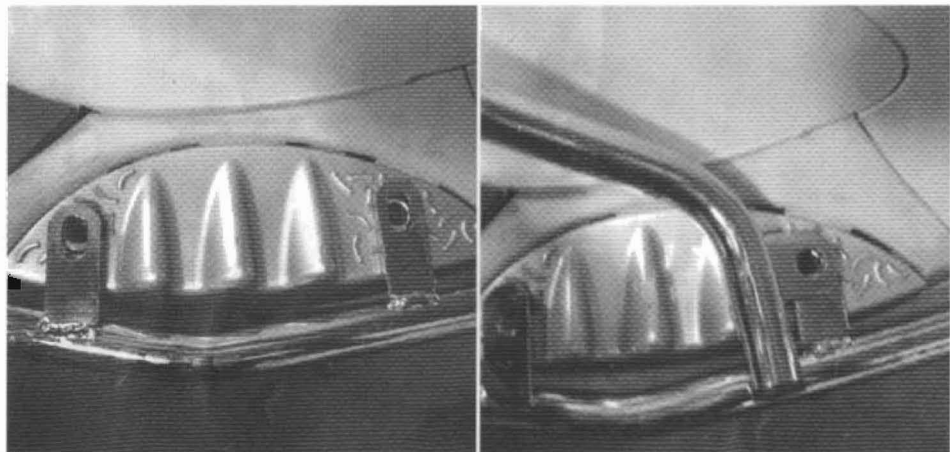

Put the shorter spacer on the front and put longer spacer on the rear.

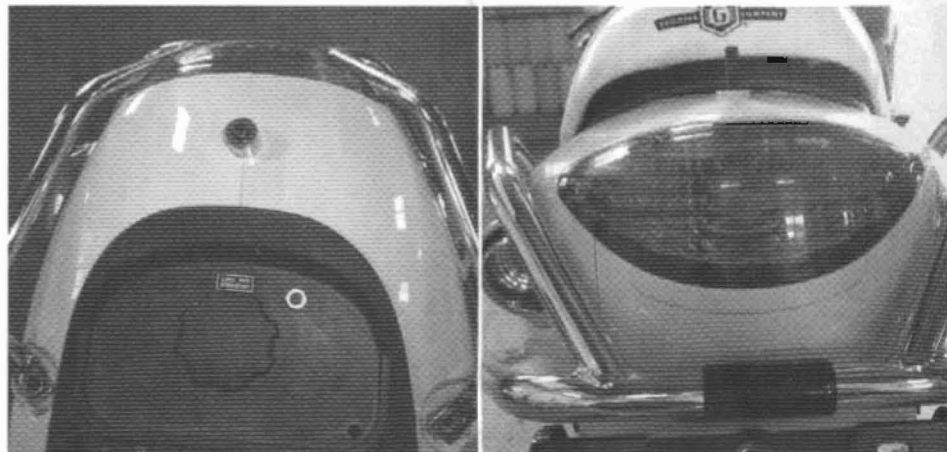

Insert the black sleeve on the rear tube of the cowl protectors.

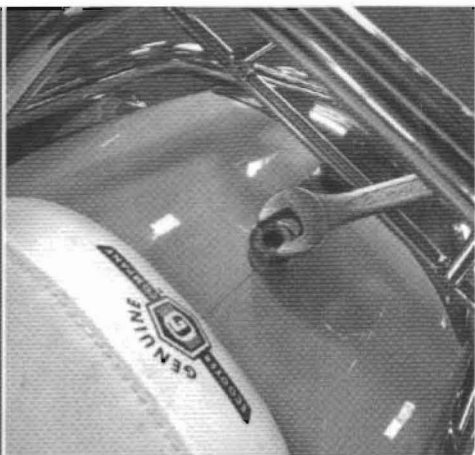

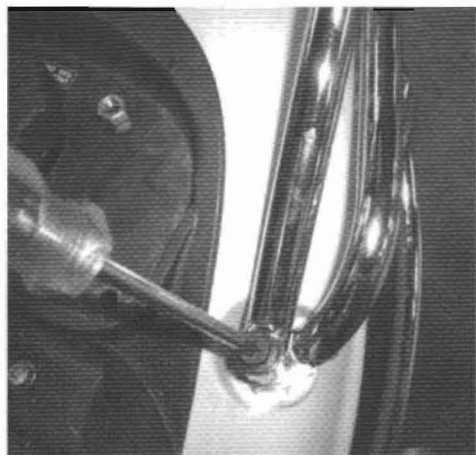

Use the longer bolt to fasten it, but do not tighten it yet.  
Repeat for the other side.

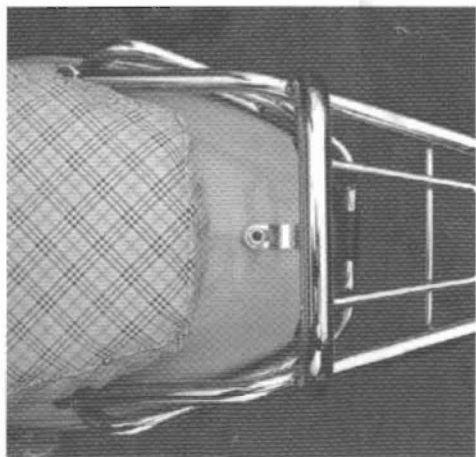

Place the left cowl protector into position as per the picture,  
then put the footrest on top.

Note the location of rear protectors.

Install the rear rack on the cowl protectors and attach them together.  
Install the nut to fasten the bracket of the rear rack.  
You **MUST** use a spacer under the bracket of the rear rack.

Tighten all bolts and nuts to complete the installation.  
The cowl protectors must be fastened with a rear rack.
