**WOMEN OWNED** 

We source all of our materials from American manufacturers. On behalf of all of us, thank you for helping keep American manufacturing in the USA.

# amodex®

Since we first introduced amodex® in 1958, it has been the stain lifesaver to customers.

Non-toxic & eco-friendly!

Our customers, employees and family use our unique non-toxic, stain fighting product and have developed the following helpful hints for you.

Keep in mind, as any professional will tell you, that the secrets to removing difficult stains are to **be patient and keep trying with multiple applications.**

Visit us on the web, [www.amodexink.com](http://www.amodexink.com), or on Facebook™ and tell us your stain success stories!

### GENERAL USE

#### Always Shake Well Before Use

- ✓ Never wet a stain or apply anything prior to using **amodex®**. Water may set a stain and make the stain harder or even impossible to remove. It is always best to use **amodex®** first. Applying another cleaning agent before using **amodex®** may reduce its effectiveness. Don't give up hope – **amodex®** is still your best bet!
- ✓ To apply **amodex®**, shake well and pour directly on stain. Rub in with a fingernail or old toothbrush.
  - On denser fabric (such as cotton), rub well with harder bristle brush.
  - On large stains (such as carpeting), use larger brush or scrub brush.
- ✓ Check first for colorfastness. Because of the different dyes used on fabrics, especially leather, we advise testing for colorfastness. Apply a small amount of **amodex®** on a hidden area (inside a garment or along a seam) and rinse. The fabric is colorfast if no color change occurs.
- ✓ Mystery Stain? Encounter a stain and don't know what it is? **amodex®** is your safe and best bet.
- ✓ Stubborn Stains
  - If you apply **amodex®** to stubborn stains on garments or linens every time you launder them, eventually the stain may lighten or disappear.
  - Reapply additional applications while fabric is still wet.
  - Leave overnight before rinsing.
- ✓ Berry Stains **amodex®** often turns berry stains blue, continue working the stain until it disappears.
- ✓ No Hairspray or Alcohol Using alcohol or hair spray on an ink stain will only further set the stain.
- ✓ Lacquer and Chemicals Inks containing chemicals such as lacquer can be a challenge to remove. The lacquer creates a seal that is extremely difficult to penetrate.
- ✓ Fine Furniture Lightly coat the stain with **amodex®** and rub gently with clean rag. Wipe clean with damp cloth.
- ✓ Take your Time Don't panic. **amodex®** will remove stains that have been there for weeks provided nothing has been applied.
- ✓ Yellowing After Cleaning Should stained area turn yellow after treating with **amodex®**, do not worry. The yellow is dried **amodex®** residue. Simply rinse the area again thoroughly with clean water and allow to air dry.
- ✓ **amodex®** removes Sharpie® and other permanent marker from:
  - **Auto:** interior, exterior paint, and car upholstery
  - **Fabrics:** including fine linens, quilts, cashmere, and silk
  - **Surfaces:** fine furniture, wood flooring, tile, etc.
  - **Upholstery:** leather, microfiber, vinyl, and more

### HELPFUL HINTS

#### Spot Cleaning Surface, Carpet, Upholstery and Drapery Stains

1. Apply a few drops of **amodex®** to stained area
2. Rub with a brush or fingernail until stain disappears. Be careful not to rub too hard on wallpaper or other delicate surfaces.
3. Rinse or blot off the **amodex®** with a damp cloth. When working with carpets or upholstery, rinse thoroughly.

**NOTE:** When cleaning silk, after rinsing, we recommend drying with a hairdryer to avoid water stains.

#### Pretreating Stains Before Laundering

1. Apply **amodex®** to stains. For example, use it to pre-treat the rings on shirt collars and cuffs or to remove mystery stains.
2. Gently rub with your brush or fingernail.
3. Launder with your other washables using your regular detergent. **amodex®** is safe even for spot treating and leaving on the fabric until you are ready to launder.

#### Before Dry Cleaning or to Spot Clean Garments

1. Follow the directions above, and thoroughly rinse the area to remove any traces of **amodex®** residue.

### MANY STAINS. ONE SOLUTION

#### Removes Tough Stains Including:

- |                                       |                  |                                    |

| ■ Cashmere   |                             |                    |
| ■ Microfiber |                             |                    |

#### Removing Heavy Ink Stains

1. Place paper towel under stain.
2. Apply **amodex®** to stain.
3. Gently rub with brush or fingernail.
4. As stain appears on paper towel, rotate the towel to a clean area of the towel and continue rubbing.
5. Continue working the stained area until no more ink appears on the paper towel.
6. Launder in a regular laundry load or rinse area thoroughly under faucet using warm water. Continue rubbing area while rinsing.
7. Repeat steps 1-6 as necessary.

\*Very heavy ink spots, especially those in pockets and along seams, take patience to remove. Although we don't guarantee that **amodex®** will always remove heavy ink spots, we know and assure you that it is your most effective choice.

Recommended by most major ink manufacturers including Avery®, Pilot®, Bic®, Tombow®, Parker®, Waterman®, PaperMate®, Newell Rubbermaid®, Montblanc® and more to remove all inks including permanent marker.

#### Unique Applications

**amodex®** is a unique lanolin-based cream formula. It is safe to use on:

- Fine fabrics - cashmere, silk, and microfiber
- Skin, hair, and pets
- Porous surfaces such as plastics, CDs/DVDs, and painted walls
  1. Coat the stained area with **amodex®** and rub with brush or clean cloth.
  2. Leave on overnight or for several days.
  3. Wipe with damp rag.
- Ghosting or Sharpie®/permanent marker from white boards
- Pen Explosions
- Staining on the interior of your washing machine or dryer from ink, crayon and dye
