

Additional Information for products hand made by this Designer.

“This product has been hand finished to create and “aged effect with character and soul” therefore each fitting and part on this light is unique, just like you and me.

Metals in this fitting have been sourced from all over the globe and may contain different brass compositions. Every component within this fitting may oxidise differently giving a multi tonal affect. We see this as a beautiful characteristic of a hand finished product.

This fitting is coated in a protective lacquer to prevent it from changing appearance. To maintain; lightly dust with a soft cloth.”
