

# Guard Dog Valves

## Days Inn Study

**November 2021**

A pilot install was conducted in Faribault, Minnesota to validate the usage of the Guard Dog Valve in Days Inn facilities. The installation completed in November of 2021. The water usage was recorded using water bills from the property. After installation was completed, the average water used per day decreased from 102,530 gal per month gallons, to 75,360 gallons, a decrease of over **25%**.
