

Guard Dog Valves

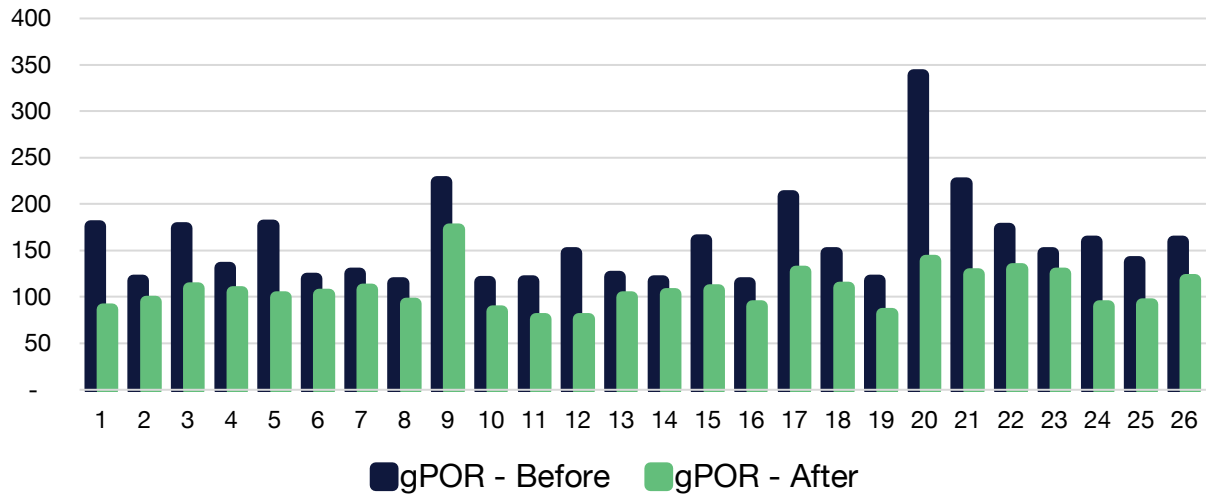

SAVING WATER 

Guard Dog Valves has successfully implemented more than 3,000 of our innovative valves in 26 economy apartment hotels across the United States, achieving impressive sustainability and cost savings results. We've managed to reduce water usage by an average of 32% across these properties, and projections suggest that by year-end we will have saved the hotel chain more than **\$460,000** in water bills. The environmental impact is equally significant, with our valves set to save an estimated **44 million gallons** of water by the close of the year, underscoring our commitment to resource conservation and efficiency.

Facility	Install Date	Days of data	Water Usage Savings (%)	Projected Annual Water (\$ Saved)	Projected Annual Gallons Saved (gal)
1	10/18/22	133	51%	\$ 38,516.69	3,442,914.57
