

Engagement Rings

Our favourite part of this job is helping our clients find
'THE' ring for their loved one.

There is nothing more special than being a part of this small
slice of their love story. Creating the symbol of their love, to
be worn for eternity is a pleasure and brings us so much joy.

Explore our lookbook for inspiration and...

Let us help you bring her dreams to life.

Happily Ever After Starts Here.

Home is not where you are from it is where you belong.
Some of us travel the whole world to find it.
Others, find it in a person.
– Beau Taplin

Fancy Favourites

For the woman who wants something a little unique and different. The most popular fancy cut diamonds requested right now are oval and pear. Fancy shaped diamonds are becoming more and more popular, they appear larger than their carat size and especially so with a halo of small round diamonds.

Now & Forever

"So it's not gonna be easy. It's going to be really hard; we're gonna have to work at this everyday, but I want to do that because I want you. I want all of you, forever, everyday. You and me... everyday."

– Nicholas Sparks

Argyle

DIAMOND COLLECTION

ARGYLE DIAMONDS originate from the world renowned Argyle Diamond Mine, located in a remote corner of Northwest Australia. Every ARGYLE DIAMOND sold is accompanied by a Certificate of Authenticity, to verify it has been tracked from the mine through a Chain of Warranty so you can be assured that you have purchased a Genuine Australian Diamond. The Argyle Diamond Mine is set to close by the end of 2020 making these diamonds even more special and coveted than ever.

PASSION8[®]
DIAMONDS PERFECT FOREVER

THE PASSION8 DIFFERENCE

PASSION8 Diamonds are precision cut in a way that creates exactly eight perfect hearts and eight perfect arrows. This perfectly symmetrical 58 facet cut ensures light refracting through the diamond only comes out the top surface. The result is an extraordinary brilliance that allows your diamond to perform amongst the best.

8 Perfect Hearts & 8 Perfect Arrows

SWAROVSKI CREATED DIAMONDS

LEADING INNOVATION

Swarovski Created Diamonds build on Swarovski's 125-year heritage of creativity, craftsmanship and innovation, marking a new step forward in the company's brilliant history of innovative man-made materials.

PIONEERING TECHNOLOGY

Under laboratory conditions of intense heat and pressure, a tiny diamond seed is nurtured with carbon atoms. Layer by layer, the diamond grows and forms before being precision-cut to perfection by expert master cutters. The result is a man-made diamond identical to its natural counterpart

FANCY COLORS BRILLIANT BEYOND NATURE

Swarovski pushes the boundaries of art and science in offering lab created diamonds in 16 astonishing colors – the most extensive assortment of hues available on the global market today, marking the promise of a colorful future.

CERTIFIED QUALITY

All Swarovski Created Diamonds are inspected by an independent gemological institute to prove that they are laboratory grown. Same as mined diamonds our lab created diamonds are hand-selected and graded per the 4Cs of clarity, color, cut and carat weight.

	LABOR GROWN	NATURAL
CRYSTAL COMPOSITION	C	C
HARDNESS	10	10
REFRACTIVE INDEX	2.42	2.42
DISPERSION (FIRE)	0.044	0.044
DENSITY	3.52	3.52

100% DIAMONDS

Swarovski Created Diamonds are identical to mined diamonds possessing the same chemical composition, hardness, brilliance and fire – just as a greenhouse-grown orchid is identical to one found in nature. The only difference is that the origin is a laboratory and not the earth.

OPEN TO ENDLESS CREATIVE POTENTIAL

Swarovski Created Diamonds are available in six classic diamond shapes: Round Brilliant, Square Princess, Cushion, Pear, Oval and Radiant. Each is a masterpiece of cutting technology with its own personality, charm, and story able to bring every brilliant idea to life.

Select Your Perfect Diamond

CUT

The cut of a diamond refers to its facets and proportions, not just its shape. The proportions between the table, the crown, the pavilion and the girdle are extremely important in ensuring the radiance is maximised. For this reason, sometimes cutting the diamond smaller to better its proportions can make it more valuable.

Heavy Deep Cut Ideal Cut Light Shallow Cut

CARAT

Carat is a term referring to the weight of a diamond and not its size in dimensions. The weight of a diamond alone is not all that is considered as a large stone is not particularly valuable if it lacks high-grade colour, brilliance or clarity. The size and shape of the "rough" diamond usually dictates the "shape" of the final diamond produced.

CLARITY

The more pure the clarity, the more brilliant the diamond appears. Diamonds are graded according to their combinations of minute mineral traces and crystal dislocations called inclusions. Flawless diamonds are extremely rare and valuable because the fewer the inclusions, the less interference with the passage of light (hence its greater sparkle).

Clarity Grading Scale

COLOUR

The whiter the colour of the diamond, the greater its capacity to reflect and refract light, and create a greater brilliance. The highest quality diamonds are described as colourless and are extremely rare. This, of course, makes them very valuable. Jewellers grade a diamond's colour on a scale beginning with D (colourless) and moving through to Z.

GIA COLOUR GRADING SCALE	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
	Colourless	Near Colourless			Faint Yellow			Very Light Yellow					Light Yellow										

Designed in Dreams

MADE BY US

Our Jeweller, using their expert knowledge will work with you to create a beautiful design that is also sturdy and practical. Whether it be a ring, or another stunning piece, indulge in your unique creative vision that, until now, only existed in your dreams.

Together we can make amazing happen.
