## Ring Size Guide

If you don't know your ring size and you do not have an existing ring to measure against our *Printable Ring Size Guide*, you can use this simple string method outlined below to determine your size:

- Wrap a piece of string around your finger. Wrapping the string around your knuckle is the best position as this is the widest part of your finger.
- Using a pen, mark the string where the two ends meet.
- With a ruler measure the length of string from the end to the pen mark.
- With this measurement, refer to the 'Finger Circumference' column of our Ring Sizing Table to determine your ring size.

Alternatively, you can order one of our free ring sizers to easily identify your UK ring size for whichever finger you are buying for! Then simply cross check this UK ring size against our Ring Sizing Table to find your perfect CE match!

If you are still in doubt, we recommend visiting a jewellers to have your ring size measured.
