

MODERN CYLINDER BIOETHANOL STOVE

Modern Cylinder Bioethanol Stove is a swanky and contemporary take on traditional log burners without the need for a chimney, flue, installation or maintenance. This fireplace comes in a gloss white painted finish and black graphite satin finish. It will bring warmth and character to any space, whether it is a contemporary interior in a new build home or a cottage-style room with a modern twist.

The Cylinder Stove can be positioned anywhere in your room as a freestanding unit. To create the most authentic look, the fireplace has decorative real log storage below and an optional faux venting pipe.

FEATURES:

- Fully adjustable 1.3 L bio ethanol fuel burner
- Built-in fragrance diffuser for Aura Fragrance Oils
- Burning time per refill: 3–6 h
- Heat output: 2–3 kW

Fully adjustable
burner

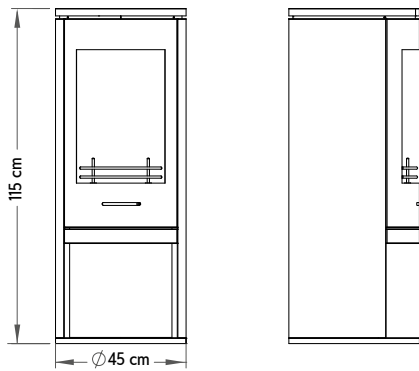

Excellent customer service. We debated whether Cylinder would look right and we're so glad we went for it. Great look, well made and also gives good heat.
