- Burning time per refill: 3–6h
- Dimensions: 47W, 32H, 27D cm
- Selection of accessories available to match your decor

Fully adjustable burner

The product, a freestanding basket with logs and coals, looks absolutely fantastic in situ and is an ingenious alternative to a real fire at a fraction of the cost of having chimney breasts ripped apart, flues installed and costly building work all of which is normally required to re open existing fireplaces. I will most certainly be recommending you to friends and once again thank you for your excellent customer service, unfortunately a rare experience in these "pile them high and sell them cheap days" of retailing. A wonderful balance and retail experience: a shop with old fashioned customer service coupled with up to the minute designs and innovations. Well done!

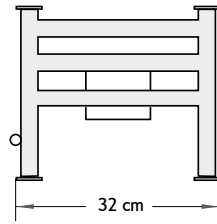

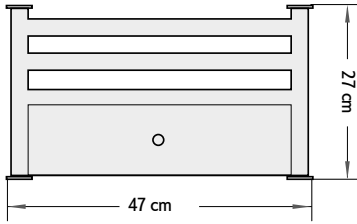

Paul
