MINIMUM REQUIRED OPENING SIZE

PRODUCTS:

ATHENA Bioethanol Grate in Contemporary Style

CHELSEA Bioethanol Fire Grates

HERMES Bioethanol Grate in Traditional Style

LEXHAM Bioethanol Mini Basket Fire Insert in Traditional Style

WILDWOOD Traditional Bioethanol Fire Grate

H (Height): 500 mm / 19.68"

D (Depth): The product can protrude outside the fireplace opening, as long as the flame is within the hole. We recommend that the grate is placed as far back in the firebox as possible to create the most realistic illusion of a real fireplace.

W (Width): There is no requisite width for the fireplace, however the grate will look more aesthetically pleasing with at least a small gap either side of the product.
