

Dart flyscreen fitting instructions TRIUMPH TRIDENT 660

Thank you for purchasing a Dart flyscreen. It has been carefully designed and manufactured to suit a specific motorcycle model and by following these instructions you should encounter no problems with fitting. The kit should comprise the following:

- 1 x polycarbonate screen
- 4 x EPDM rubber grommets
- 1 x left hand mounting bracket
- 1 x right hand mounting bracket
- 4 x M5 x 30mm stainless hex head screws
- 4 x 13mm aluminium bushes
- 4 x stainless hex head machine screws
- 4 x washers

- 1 Fit the grommets to the screen - this is best achieved from the back of the screen blade.
- 2 Underneath the instrument mounting bracket, there are four screws holding the bracket to the top yoke. Using a 5mm Allen key, undo the rightmost pair of these. Be patient - they're fiddly and difficult to get to because of the cabling.
- 3 Insert the right hand screen mounting bracket underneath the instrument bracket, place one of the aluminium bushes on the innermost hole and feed one of the M5 x 30mm screws through the bracket and bush, into the top yoke. Loosely secure using a 3mm Allen key, then do the same for the outermost hole. Once both are in position, you can tighten the screws fully, being careful not to overtighten as they're only 3mm heads.
- 4 Repeat operation for left hand side.
- 5 With both brackets fixed, hold the screen blade in position and loosely fit the bottom two hexagon head machine screws with their washers, ensuring that they engage in the captive nuts on the brackets. Do not tighten these yet.
- 6 Fit the top two machine screws. Once everything is in position, gradually tighten all the screws evenly until they are seated on the brackets.
- 7 Double check that everything is sufficiently tight and if so, fitting is now complete!

MAINTENANCE: No special maintenance is required. Do not use solvents to clean - just warm soapy water. Many proprietary glass cleaners are suitable for polycarbonate - check the label before trying.

IMPORTANT NOTICE: Whilst the screen provides a good level of impact protection, it is not warranted unbreakable. It is NOT a substitute for eye protection, which should be worn at all times while riding.
