The animal life protocol is as follows:

- The animal is born and kept with the mother for three months.
- The animal is then feed with concentrate for three more months.
- By the age of 6 months the animal is transferred to pasture-grass feed until they reach 2 years of life, aprox 400-450 kilos live weight
- Then the animal enters feedlot protocol for 300 to 360 days
- During the entire life of the animal is treated according to animal welfare protocols, and are absolutely free of hormones, antibiotics or animal protein fed.
