

## intraMAX CONTINUED

As Seen Under A Dark Field Microscope - Before Taking intraMAX Blood Analysis versus A Post intraMAX Blood Analysis

The pictures below represent the change in seconds after taking 1 oz. of intraMAX. In the "After" picture there is considerably less clumping of the blood cells and a more uniform, healthy blood flow, and consistency.

## HUMAN CLINICAL TRIAL

Evaluating the Efficacy of intraMAX

In this randomized, gold-standard, double-blind placebo-controlled study, intraMAX was shown to be a highly effective (efficacious) means of improving one's nutritional markers while helping to maintain and improve intra-cellular systems and functions.

Details of the efficacy results supported by the clinical study findings on intraMAX can be grouped into the four areas: energy, intra-cellular function, detoxification and optimal wellness:

**"intraMAX 2.0 IS BY FAR THE BEST NUTRITIONAL SUPPLEMENT ON THE MARKET! BECAUSE NUTRITION IS INTEGRAL FOR THE BEST OUTCOMES, I RECOMMEND IT FOR ALL MY PATIENTS. I TAKE IT MYSELF AND FEEL THAT IT PROVIDES A GREAT BASIS FOR OVERALL WELL-BEING."**
