

LASH LIFT INSTRUCTIONS

PROCEDURE

First, analyze the thickness of the lashes

Second, prepare the eyelashes for the Lash Lift System

- Use My Lamination 4 IN 1 Cleansing Foam to degrease and clean the eyelashes of any dirt and/or makeup
- Fix a silicone pad of the appropriate size on the upper eyelid using My Lamination Lash Lift Glue
- Spread and fix the eyelashes on the silicone pad using glue and an applicator

Third, perform the Lash Lift using Step 1, 2, & 3 + LashBotox

- ① Lifting Cream + ② Neutralising Cream + ③ LashBotox ④ Hydrating Serum +

Aftercare Recommendations

Avoid sleeping face down on the pillow as well as washing eyelashes in the first 4 hours after the procedure to ensure the LashBotox and Hydrating Serum is reaching its full potential. The use of Vitamin Lash Serum Home is highly recommended for the customer as home care twice a day.

LIFT STEPS

1 Lifting Cream +

- Apply Step 1 on the eyelash curl area avoiding the tips. The processing time is 7-12 minutes. Do not cover with plastic
- When the processing time is finished, remove the excess of the solution with a slightly damp make-up brush or q-tip in the growth direction of the eyelash

2 Neutralising Cream +

- Apply Step 2 on the eyelash curl area for which Step 1 was previously used. Leave it for half of the time of Step 1 + 2 mins
- When the processing time is finished, remove the excess of the solution with a slightly damp make-up brush or q-tip in the eyelash growth direction

Tinting (optional)

- Mix your My Lamination Tint and Color Developer together according to box instructions and apply to the eyelashes, making sure to fully cover all lashes evenly
- Apply My Lamination Cleansing Foam on the eyelashes to stop the chemical reaction and fully clean the lashes, then remove foam with a damp q-tip or brush

LashBotox (highly recommended)

- Apply the LashBotox only after the eyelash tint and/or removal of all glue, fully cover the eyelashes with LashBotox, avoiding the roots
- Leave on for 5 minutes and remove excess product with a damp q-tip or brush

3 Hydrating Serum +

- Apply Step 3 onto clean eyelashes, leave it for 1-2 minutes until fully absorbed by lashes, remove excess with a dry q-tip if needed

BROW LAMINATION STEPS

PROCEDURE

First, analyze the thickness of the eyebrows.

Second, prepare the Eyebrows for the Brow Lamination

Use My Lamination 4 IN 1 Cleansing Foam to degrease and clean the eyebrows of any dirt and/or makeup

Third, perform Brow Lamination Step 1, 2, & 3 + LashBotox

① Lifting Cream + ② Neutralising Cream + ③ LashBotox ④ Hydrating Serum +

Lastly, perfect the Eyebrows

Once you have completed the Brow Lamination procedure, perfect and enhance the brows by filling and sharpening the colour, we highly recommend our My Lamination Pencil Collection

Aftercare Recommendations

Avoid sleeping face down on the pillow as well as washing eyebrows in the first 4 hours after the procedure to ensure the LashBotox and Hydrating Serum is reaching its full potential. The use of Vitamin Lash Serum Home is highly recommended for the customer as home care twice a day.

LAMINATION STEPS

1 Brow Lift Cream

- Apply Step 1 on the area, processing time is 7 - 14 minutes when not using glue to adhere the eyebrow hairs, if using glue, processing time is 9 - 16 minutes, do not cover with plastic
- When processing time is finished, remove the excess of the solution with a slightly damp cotton pad or q-tip in the direction of eyebrow growth

2 Neutralising Cream

- Apply Step 2 on the eyebrow area for which Step 1 was previously used, ensure brows are in desired position and leave it for half of the time of Step 1 + 2 mins
- When processing time is finished, remove the excess of solution with a slightly damp cotton pad or q-tip in the direction of eyebrow growth

Tinting (optional)

- Mix your My Lamination Tint and Color Developer together according to box instructions, apply to eyebrows making sure to cover all hairs evenly
- Apply My Lamination Cleansing Foam on the eyebrows to stop the chemical reaction and fully clean the brows, remove foam with damp q-tip or cotton pad

LashBotox (highly recommended)

- Apply LashBotox only after the tint and/or removal of all glue
- Fully cover the eyebrows with LashBotox and leave on for 5 minutes
- Remove any remaining product with a damp q-tip or cotton pad

3 Hydrating Serum

- Apply Hydrating Serum onto clean eyebrows, leave it for 1-2 minutes until fully absorbed by the eyebrows, remove extra with dry q-tip if needed.
