

## BGM WITH THE VITALIZER LUXURY

Your direct occupational health management implementation tool in your company.

VITALIZER   
LUXURY

Rejuvalize - upgrade your life

## Health management directly in the workplace.

The Vitalizer Luxury is used directly in the work environment, allowing employees to benefit from its positive effects at any time.

By installing the Vitalizer Luxury in your company, you cover several aspects of occupational health management. The various application possibilities address the individual needs of your employees.

Recovery, movement, stress management, and prevention are fundamental aspects of contemporary occupational health management. Conscious, efficient regeneration time is essential in the work routine; creativity, motivation, and performance are enhanced.

Recovery	Movement	Stress management	Prevention
<ul style="list-style-type: none"><li>• Fastest recovery effects</li><li>• Promotion of creativity</li><li>• Regeneration of energy levels</li><li>• Power nap possible thanks to reclining position and timer function</li></ul>	<ul style="list-style-type: none"><li>• Stretching and mobilization of the entire spine</li><li>• Stimulation of blood circulation and the lymphatic system</li><li>• Compression massage</li></ul>	<ul style="list-style-type: none"><li>• Foot reflex zone massage</li><li>• Reduction of stress hormones</li><li>• Music therapy via integrated sound system</li><li>• Relaxation programs</li></ul>	<ul style="list-style-type: none"><li>• Regular massage protects against chronic ailments</li><li>• Massage effects on the muscles</li><li>• Prevention of neck problems</li></ul>

- Various color combinations available
- Upon request, we can personalize your Vitalizer Luxury with your company logo
- Easy use with automatic programs and touchscreen function
- Time management through the integrated timer

## A Swiss development

The Vitalizer Luxury is a quality product from the Swiss manufacturer Vitalizer International AG. The Vitalizer Luxury embodies over 10 years of experience in the development and distribution of numerous therapy, medical, and health products.

Vitalizer International AG creates solutions to enhance the quality of life for individuals by preventing, alleviating, and treating issues that people face in today's performance-oriented society. We operate sustainably and embrace the responsibility of being a socially and ethically responsible company. We consider health to be the highest asset of individuals and the most essential foundation for quality of life.

## Collaboration with Spiraldynamik®

Dr. med. Christian Larsen is a physician, co-founder of Spiraldynamik®, bestselling author, award winner, and honorary senator. His research and work focus on 'anatomically correct movement' and 'training instead of surgery.'

He practices as a physician in his own clinic at the Privatklinik Bethanien in Zurich. Christian Larsen serves as the Medical Advisor for Product Development at Vitalizer International AG.

Spiraldynamik® and Vitalizer - both share an interest in the human movement system and a commitment to optimal body functioning in the balance between activity and relaxation. Spiraldynamik® focuses on posture and movement, while the Vitalizer emphasizes relaxation and regeneration. It is ideal for muscle tension (reducing muscle tone) and stress (positive impact on the nervous system, the so-called sympathovagal balance).

The combination of muscle relaxation and nerve balance has widely recognized positive effects on performance, health, and quality of life. The goal of successful occupational health management is not only the improvement of employee job satisfaction, performance, and resilience but also the reduction of absenteeism, turnover, accidents, and the lowering of insurance premiums.
