Environmentally Safe VpCI®/MCI® Technologies

BioPad® Biobased Emitter powered by Nano VpCI®

DESCRIPTION

BioPad® is a unique flexible corrosion inhibiting device constructed from biobased non-woven material. BioPad® provides an eco-friendly sustainable packaging option for corrosion inhibition. Its high VpCI® concentration, in combination with thin design, results in material reduction by up to 94% in comparison to similar polyurethane foam emitting devices.

BioPad® is easy to use. Simply placing the correct size BioPad® into your package will allow metal items to be protected. Parts protected with BioPad® are always ready for use; no degreasing or coating removal is required; just remove the item from the package and put to use.

PACKAGING & STORAGE
