TYPICAL PROPERTIES

PRODUCT DESCRIPTION

M-531 is an oil-based package of corrosion inhibitors for petroleum and synthetic lubricants. M-531 provides outstanding vapor and contact corrosion protection with excellent demulsibility.

M-531 is effective in a variety of conventional and synthetic base stocks.

FEATURES

- Excellent vapor and contact corrosion protection
- Excellent non-staining properties
- Can be used in hydraulic applications
- Compatible with most mineral and synthetic oils
- Suitable for preservation and intermittent use conditions
- Resists gelling when contaminated with water

TYPICAL APPLICATION

M-531 can be used in a wide variety of industrial lubricant applications where excellent rust protection, and water resistance are required. In rust preventive applications it is particularly useful for coiled steel or stacked parts due to its outstanding non-staining properties.

Typical dosage ranges between 3% to 5% in the base stock. For larger void space protection, M-531 may be fogged at 1ft. oz./cu ft. (1L/ m³)
