

10c Refund Recycling Scheme

Most people are aware that we can claim 10c refund on certain bottles and cans, and for some it may seem like too much effort for too little return – but collectively it's a great way to make a big contribution to Katie Rose Cottage Hospice without you being out of pocket, and would be so much appreciated, as every dollar counts toward us being able to provide such a wonderful service.

Eligible beverage containers

Most aluminium, glass, plastic, steel and liquid paperboard beverage containers between 150ml and three litres are eligible for a refund when returned to a container refund point. To be eligible the beverage container must:

- Have contained a beverage product that is not excluded from the scheme. For example, cordials and plain milk are not included in the scheme so containers that have held these products are not eligible for a refund
- Display the refund mark. This is so that the container refund point operator can see if the container is part of the scheme. Most containers will already have a refund mark for SA and NT and these containers are eligible under Containers for Change. Beverage manufacturers have until 1 December 2019 to display the new refund mark on their containers

Excluded beverage containers

There are some beverage containers that are not eligible for a refund. Generally excluded containers are those that are less than 150ml and greater than three litres. Other excluded containers include:

- Any plain milk containers
- Any glass containers which have contained wine or pure spirits
- Containers 1L or more which have contained flavoured milk, pure fruit or vegetable juice, cask wine or cask water
- Concentrated/undiluted cordial or syrup containers
- Sachets above 250ml which have contained wine
- Registered health tonics

Excluded containers, such as plain milk bottles and glass wine bottles, can still be recycled through existing kerbside collection or drop-off services.
