**MADE IN
BRITAIN**

DL50

The **DARAY**® DL50 dental light uses a unique reflector design to produce outstanding colour rendering and shadow reduction.

Lamp-bar

The lamp-bar can be changed safely and easily without any tools and without risk of burns.

Flexible and durable support arms

The support arms are ergonomically designed to allow as full a range of movement as possible in order to accommodate all dental techniques.

Positioning is easy since the arms need only finger-light control, yet do not drift once in position.

Hygiene and safety

The styling eliminates all finger traps and, by being smooth and rounded, significantly aids disinfection, barrier protection and cross-infection control.

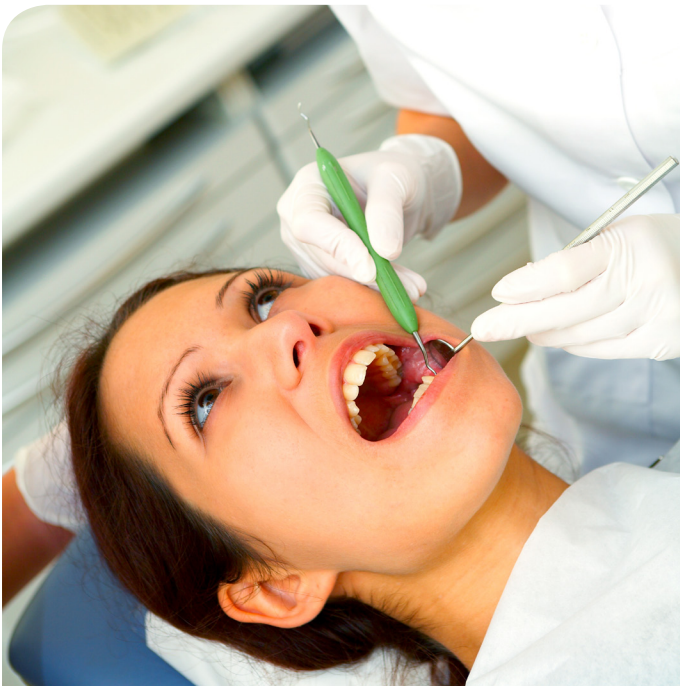

Mains voltage is reduced by a transformer to a safe low voltage throughout the arm and all moving parts.

Mounting

The DL50 can be mounted on the ceiling, wall, or mobile stand.

Features

- 'True daylight' output renders natural tones
- Flexible arm design ensures precise and stable positioning
- Clear shadow-free beam ideal for cosmetic work
- Robust, removable and autoclaveable handles
- Ceiling, wall, and mobile options
- High-output intensity
- 360° light-head rotation
- Aesthetic styling

BioProtect® is an antimicrobial solution coating applied to DARAY's products for infection control. Our core products are medical, dental and veterinary lighting used by specialist staff treating patients.

Infection is the highest risk in patient environments. BioProtect® provides excellent protection against illness-causing bacteria such as MRSA, Salmonella, E. coli, Campylobacter and many other bacteria and fungal growths.
