

Ignite Girls' Passion for STEAM Choiceboard

Choose three or four activities that interest you.
Cross off each square as you complete the activity.

Personal Interests Can Make a Difference

Girls are often very passionate, focusing on topics that mean the most to them. Inspire them to discover how their interests can be used to better our world.

Introduce Girls to STEM Role Models

For more information about female STEM role models, check out our blog post: [The Past, Present and Future of Women in STEM](#)

Connect Lessons to Girls' Natural Strengths

Give female learners opportunities to shine with activities that play to their natural strengths:

Problem-solving • Creativity • Open responses
Critical thinking • Collaboration

Take STEM Instruction Outdoors

Watch this video to see how this educator blends STEAM and gardening to give students ownership of their learning:
