

GOLD PLEATED PANELS

GOLD M5 SPRAY BOOTH PLEATED PANELS

DESCRIPTION & APPLICATIONS

Pleated panels measuring 45mm in depth. Gold performance for higher filtration to M5.

These panels are designed to filter the air ENTERING your spraying areas but can also be used as secondary extraction filters.

The pleated panel filter is a standard capacity disposable product offering a better than basic level of filtration, or pre-filtration in HEVAC applications. This product is made using patented Kimberly Clark Intrepid media, which delivers a constant level of filtration performance throughout its life and is made from continuous fibres so will not shed. It has a graduated density for even and greater holding of dust and is hydrophobic so will not load with air moisture. The AquaKote water repellent card frame with superior tear resistance when wet and dry is manufactured from a renewable source.

TECHNICAL DATA

Classified M5 to EN779:2012

Depth 45mm Rated Airflow 2.5m/sec

Initial Pressure Drop 70PA

Final Recommended Pressure Drop 250PA

Rated Airflow 1623 m3/hr
