

Protect your business from disruption, financial loss and reputational damage.

Over 90% of cyberattacks start with email - and the sophistication and volume of cyber threats continues to grow. Libraesva provides exceptional email security by integrating cloud email and a secure email gateway with our unique Adaptive Trust Engine that uses Artificial Intelligence to learn the usual patterns of behavior for organizations & individuals, continuously assesses the strength of business-to-business trust and proactively holds anomalous traffic.

BLOCK THREATS

Block known and emerging email threats from reaching their target, so you only receive legitimate messages.

- Scan and filter all inbound and outbound emails for advanced malware, phishing, business email compromise, spam and more
- Gateway and cloud email API - get the best of both worlds with integration to your cloud email combined with secure gateway scanning for complete visibility of email traffic
- Protect users from visiting unsafe sites with active URL analysis that checks every link at time of click, to overcome obfuscation, encryption and other evasion techniques
- Gateway sandbox removes dangerous payloads and active content from attachments

PREVENT FRAUD

Prevent business email compromise, phishing and email account takeover with advanced behavioral protection to stop theft and financial losses.

- Adaptive trust engine learns usual patterns of communication behavior for organization & individuals
