Special Explanation

⚠ WARNINGS

- Please check the guide book carefully before using and keep it properly for further checking.
- The vehicle must have been installed and check the confirmation by adults before use.
- Suitable age is 37-95 months, not suitable for children under 3 years old or above 8 years old.
- Forbidden overage and overload children to play it. Maximum capacity is 35KG.
- It is not a vehicle. Please do not play it on the road. Adults should supervise.
- Forbidden to play it in the public street, road, slope, pool or stair and other dangerous areas.
- Do not use this product in high-voltage line, transformer station, gas station, hospital.
- Charging should be done by adults. Away from inflammable or explosive objects. Do not let children play charger, it is not a toy.
- Do not wash the vehicle with water, use a soft damp cloth to clean.
- Must use this vehicle with shoes, with safe-belt.
- In order to prevent a child from suffocation, keep plastic bags away from children.
- Only adult can operate the remote control, and must keep distance within 10m for remote control and car. In the same place, must not have two or two above cars using remote control.
- Not to be used in traffic.

Disposal of Battery

- Do not throw into a fire. The battery may explode or leak.
- Your sealed lead-acid battery must be recycled or disposed of an environmentally sound manner, or will pollute environment.
- Return an exhausted battery to your local approved lead-acid battery recycle.

Thank you for choosing our vehicle. Each vehicle pattern is designed upon a unique mold: such as the realistically imitated vehicle and cute series, which bring different fun and feeling for your children.

We wish our vehicle to accompany your children for a happy childhood and your family will be filled with joy and happiness.

Suitable Age	37-95 Months	Load Capacity	<35 KG
Speed	3-6 KM/H	Size of Car	1250*720*560 MM
Driving Motor	FD550-12V RPM10000 or 550-6V RPM13000	Turning Motor	RS390SP12V RPM6000 or 380-6V RPM10000
Charger	Input: 110V or 220V 50HZ Output: DC12V or DC6V	Battery	12V-7Ah or 6V10Ah
Power Way	Charging Type	Charging Time	8-12 Hours
Fuse	10 A	Average Battery Life	Approximately 300

Additional function instructions

- Do not let any child touch the wheels or near them when the car is moving. Do not tow anything behind the vehicle or overload it, do not exceed the maximum weight capacity of 35 kgs.
- Battery/Charger/Alkaline Batteries**
 - The battery/charge/alkaline batteries are not toy, forbidden for children playing.
 - Non-rechargeable batteries are not to be recharged.
 - Do not mix old and new batteries or batteries of different types: alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium).
 - Battery charging must be done by adults only.
 - Remove rechargeable batteries from the vehicle before charging.
 - Insert batteries are correct polarity inside the battery compartment. (Like the picture)
 - Remove exhausted batteries from the product.
 - Remove batteries during long periods of non-use.
 - Never short-circuit the battery terminals.
 - Use only with manufacturers prescribed rechargeable battery and charger.
 - Do not use the battery or charger for any other product. Could cause overheating, fire or explosion.
 - Do not open the battery and the charger
 - Do not charge battery upside down.
 - Always maintain battery dry. Do not let the vehicle contact fresh water or salt water.
- Charge**

 - Only adult can handle or charge the battery. Never allow children to do that. Turn off power switch before charge the battery.
 - Connecting correct polarity when charging.
 - Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charge or the battery until you have replaced the worn or damaged parts.
 - When the vehicle's normal speed apparent slow down or after each use, recharge the battery for 8-12 hours, never charge the battery longer than 18 hours.
 - Charge the battery in a dry area ONLY.
 - It is normal that charger and battery are tepid while charging.
 - Charge the battery at least three months one time, even if the vehicle has not been used.
 - In room temperature below 5 degrees centigrade, charging the actual to lengthen 3-5 hours. Below -5 Celsius please do not use this product.

Problems and Solution Guide

- Cause: electric line system is damaged. Please contact retailer or manufacturer.
- Cause: motor is damaged. The motor needs professional repair. Please contact retailer or manufacturer.
 - Problem: The battery can not be charged
- Cause: battery connector is loose. Make sure the battery connector is firmly plugged into each other.
- Cause: charger is not plugged in. Make sure the charger is plugged into the wall outlet and the wall outlet power is on.
- Cause: charger is not working? Is the charger warm while charging? If not, the charger may be broken and please contact retailer or manufacturer.
 - Problem: The vehicle does not run very long
- Cause: battery may be undercharged. You may not be charging the battery long enough. After each use or per month charge the battery for 8-12 hours. Do not charge over 18 hours.

Caring for Your Vehicle

- Vehicle body is modeled by polypropylene. Solarize or in -15°C use are strictly prohibited. Vehicle should be far away from hot objects, like an oven and heated plastic parts may melt besides.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the car with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode and can cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth for a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap or water or spray the vehicle with a hose.
- Do not modify the electric system. When the fault appears and they must be maintained by professional. Alterations could cause a fire resulting in serious injury and can also ruin the electrical system.
- Use for about half month, check the wheels turning agilely or not, motor work is normal or not. Using infuse tube to lubricate moving parts.

Packing List

Please identify all parts before assembly and save all packaging materials until assembly is complete.

Charging Your Vehicle

- Plug the charge port into the input socket.
- Plug the charger into the wall outlet. The battery will begin charging.
- The charge point is located on the right side of the seat.

Problems and Solution Guide

- Problem The vehicle does not run**
- Cause: The battery may low on power. After each use and once a month minimum, charge the battery for 8-12hrs. Do not charge over 18 hour.
 - Cause: Thermal fuse has tripped. The vehicle is equipped with a self-resetting fuse. When the vehicle is overloaded or operated incorrectly, the self-resetting fuse will be cut off for 2 minutes before becoming operational again. The self-resetting fuse is under the seat (refer to the picture)

- Cause: battery connector or wires are loose. Make sure the battery connectors are firmly plugged into each other.
- Cause: battery is dead. Please contact retailer or manufacturer.

How to Operate Your Vehicle

Notice: When you switch forward/backward, please make sure the vehicle has completely stopped, otherwise it will damage the gear box and the motor. If using the remote control operation, please refer to guide book page 13.

- power switch, forward/backward switch, battery indicator, MP3 slot and volume adjuster are on the instrument platform, charging hole is on the front of the seat.
- Music: Press the music button, music will be played. If there is no more press, music will stop automatically.
- Mp3: Turn on the power button, inserting Mp3 wire into Mp3 slot, then adjusting the volume adjuster as you like.
- Battery indicator: this car has battery indicator. If 6V battery, usually max voltage is 6.5V, lower than 6V, please charge. If 12V batteries, usually max voltage is 13.1V, lower than 12V, please charge.

⚠ Do not be close to the ear, improper use can cause hearing damage!

Assembly Steps

Connecting Motor Line

- Connecting the car connector and the motor connector

Connecting and Battery Line

- Inserting red wire on the car into red column on the battery. Inserting black wire on the car into black column on the battery. (Avoiding inserting into the incorrect polarity)

Assembly Steps

- Step 2: Steering Wheel Assembly**
Connect the music connector and power assisted steering connector pair the connector on the car. Then insert steering wheel into direction lever, alignment the hole, use the machine screw to tighten.
- Step 3: Door Window and Rearview Mirror Assembly**
Insert the door window to the instrument of the car, then insert the rearview mirror to the door window, press to the right place until hearing the "crack".

- Step 4: Front Window Assembly**
Insert the front window to the instrument of the car, press to the right place until hearing the "crack".

- Step 1: Front, Back Wheel Assembly**
Put brake pads, gasket, then screw the nut and wheel cup. (If the order car is 4 motors, both front and back wheels all have motors, If the order car is 2 motors, only back wheels have the motors.)

Assembly Steps

- Step 6: Seat Assembly**
Before seat assembly, please do step which page 6 said, connector the battery wire and motor wire firstly, press the seat into car body, use the screw to tighten the car and the seat.

- Step 5: Rear Spoiler**
Press the rear spoiler into the rear body of the car until hearing the "crack".

- Step 7: Insert the car windows to the door side, put the screws on each side so that fix the windows.**
