SWEET STORIES

A collection of adorable animals that can be part of the table setting when celebrating birthdays or another special event. Use the cute little animals not only on the birthday table but also for Easter, Christmas, on the windowsill and mixed with our other designs.

PIPANELLA

One of our most popular series representing small pieces of art in their own right. Poetic in their expression; feminine yet masculine and robust yet fragile. Elegant surfaces, beautiful glazes and surprising patterns.

WINTER STORIES

In the Nordics you can experience long, cold and dark winter nights. With Winter Stories we invite animals from the deep, dense Nordic forests and lit candles into our homes bringing warmth and coziness.

SAMSURIUM

Objects d'art that tease and challenge your living space. Recognizable shapes in new contexts demanding the attention of the viewer. Any Samsurium piece will add magic to existing interior.

SAMSURIUM SERVING

Setting a table with Samsurium Serving will create a magic, fairytale like expression whether for breakfast, for lunch, for dinner – and everything in between. Food simply tastes better when served on beautiful tableware.

THE DESIGNERS

Vi vil gerne udfordre den nordiske designbranche med modige designs og arbejder sammen med dygtige designere, der er kunstnerisk anlagt. Du kan læse mere om de enkelte designere herunder.

THORA FINNSDOTTIR

◆ Known forms get new life in Thora's workshop.

CHARLOTTE ADRIAN

Charlotte Adrian graduated from the Danish Design School in 2004 and has since worked with both design, concept development and product development for both design companies and as an independent designer.

Functionality and aesthetics are intertwined in her designs, with an emphasis on storytelling and tactile materials.

Production

THE PROCESS

Many of the Dottir designs have taken years to bring to life.

Making ceramics is a complex process. As all processes are made by hand there might be small differences between two similar items in both shape and color adding to the personality of the products.

The casting process is affected by humidity and the glazing process is affected by where in the kiln the product is placed during firing.

Only very few ceramic manufacturers in the world are able to handle the advanced production and unique glazing processes.

◆ Checking the details

◆ The Moulding process begins

◆ The Pipanella is taken out of the mould for further processing
