## A few words about our company...

Pest Control Europe designs, manufactures and distributes the WEITECH pest control solutions in Europe and the Mediterranean countries.

By constantly incorporating the latest technology and research findings, we offer an up-to-date and innovative range of effective products. We specialise in this sector because we only manufacture ultrasonic products.

### At WEITECH we have very strict requirements:

- ✓ Respect for the environment
- ✓ No harmful chemicals
- ✓ No poisons
- ✓ Proven performance

[www.weitech.com](http://www.weitech.com)

The WEITECH brand was originally created in the USA and then moved to Belgium to develop activities in Europe.

The company Pest Control Europe, which owns the WEITECH brand, has been fully owned since 2014 by the French family group SOJAM ([www.sojam.fr](http://www.sojam.fr)), which specialises in pest control products on 2 main markets: protection of stored grains and pest control products for consumer market.

**All the WEITECH products must meet strict quality standards while offering performance and full customer satisfaction.**

# AN INNOVATIVE PEST CONTROL RANGE INTEGRATING THE LATEST TECHNOLOGIES

**CONTACT: +32 10 88 72 20**  
**office@weitech.com**

# LEGISLATION IS MORE AND MORE COMPLEX FOR PEST CONTROL PRODUCTS

## Restrictive regulation for plant protection products and biocides

### Plant protection products regulation:

- Synthetic plant protection products are not allowed in self service to be displayed, they need to be stored and locked in the outlets in many countries.
- Synthetic plant protection products have to be stored separately from other products (Portugal).
- In 2019, ban of synthetic plant protection products for consumer market in some European countries (France, Sweden...).

### Biocidal products regulation:

- Evolving with new constraints (for example: reduction of packaging sizes for the rodenticides).
- Fewer active ingredients.
- New law in preparation for 2023 application in France: biocides will be forbidden in self-service outlets.

Chemicals are submitted to storage and transportation constraints.

### Regulatory constraints:

- The market regulation for plant protection products and biocidal products is changing rapidly.

## Pesticides and chemicals receive a bad press

### Pesticides are criticized:

- Neonicotinoïdes kill the bees.
  - The famous herbicide glyphosate suspected of causing cancer.
- Endocrinal disruptors may be dangerous.

## We are specialized in this sector as:

- We only manufacture ultrasound repellers with our **qualified engineers**.
- We have our **own molds** and we work directly with our factories every day.
- The quality of the different materials and ultrasounds ensure **longevity** of products over time.
- We have high quality requirements, every batch are tested.
- **Certifications** are key for us, factories are ISO 9001, all products are fully conform to the legislation of the market (RoHS, REACH, CE...).
- We have a real **after-sales service** with a response in less than 48 hours: consumers can reach us at any time via [info@weitech.com](mailto:info@weitech.com).
- We are reactive: **promotions and displays** can be rapidly created and placed in the stores.

# WHY WEITECH?

A PERFORMING  
INNOVATIVE HIGH  
QUALITY RANGE

WEITECH, a high-quality pest control product range available in Europe, with an efficient after-sales service and logistics, without pesticides and respectful of the nature.

Thanks to WEITECH, you will have an alternative offer that will allow you to:

- Attract new consumers.
- Meet your consumers' demand with a differentiated offer of the latest generation of pest repellents.
- WITHOUT POISON, WITHOUT PESTICIDES, AND WITHOUT CHEMICAL PRODUCTS.
- Have innovative products in your assortment.
- Generate an increase in your turnover.
- Ensure significant rotations and margins in your point of sale.
- Obtain consumers' satisfaction and offer them safety at home.

# ELECTRONIC PEST REPELLERS

## OPERATION AND EFFECT

Weitech electronic repellents are devices that repel numerous animals and insects using ultrasonic signals and/or high-intensity sounds. These animals and insects can hear higher frequencies than humans can; these are ultrasonic. Combining changes in frequency and intensity, Weitech repellents drive numerous pest animals and insects away without injuring or killing them.

### Repellent effect of ultrasonic signals

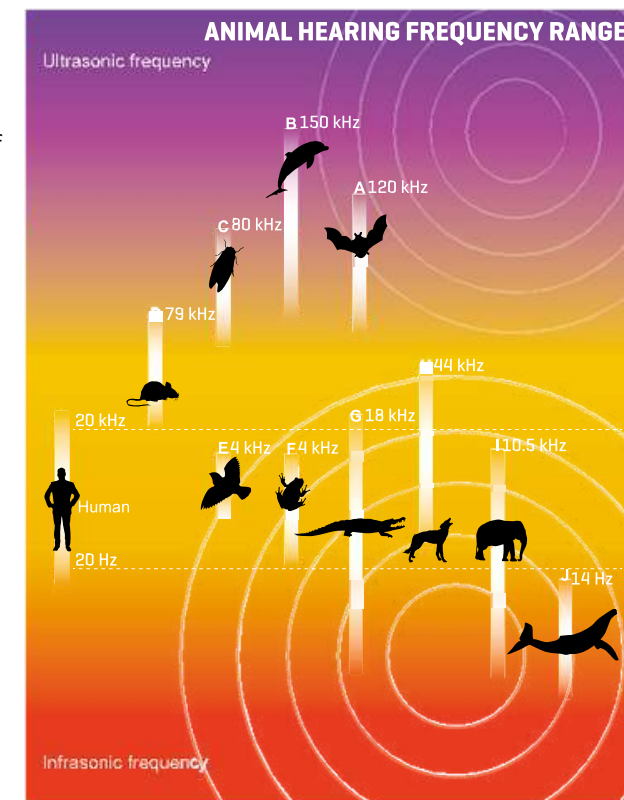

- Weitech devices combine frequency and intensity.
- Ultrasonic signals disrupt the nervous systems of animals and insects.
- They affect their feeding habits, communication, relationships and sense of direction.
- The animals move away.

### Vibration effect

- This technique targets burrowing animals living in the garden (moles...).
- It disrupts their sense of direction and their ability to hunt and forces them to change their territory.

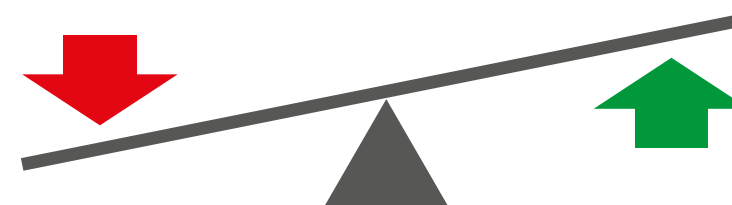

### Environmentally friendly solution

- Animals and insects are repelled by a natural method that protects the environment and human health.
- Weitech does not use any chemical products or poisons.

### Characteristics of the ultrasounds

- Are very effective against most of animals.
- Are (in most of case) inaudible.
- Have a long lifetime.

- Do not go through walls.
- Are absorbed by soft materials, are not reflected.
- Have to be placed according to the configuration of the rooms.

# ELECTRONIC PEST REPELLERS

## ULTRASONIC WAVES:

### Initial results

Depending on the pests and the degree of infestation, initial results can be discernible after 3 to 15 days. Movements of rodents then diminish rapidly. The level of activity of insects may intensify as they have to leave the shelter before moving away. Only the eggs and larvae of the targeted insects are not affected by the ultrasonic signals. It is only afterwards that the insects will be forced to leave the area.

### Advantages of ultrasonic signals

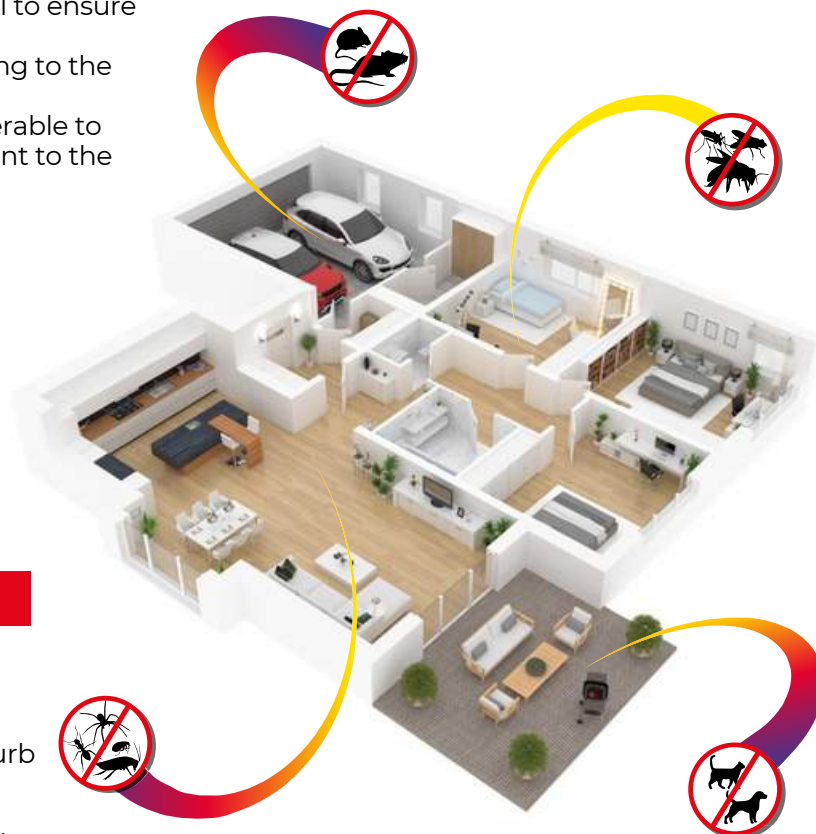

- Continuous repellent action without injuring or killing pests, 24 hours per day.
- No environmental or health risks.
- Effective in 3 to 5 days depending on the targeted test and the degree of infestation.
- Can be used indoors and outdoors.

### Positioning the device

- The position of the device is crucial to ensure optimum effectiveness.
- This must be investigated according to the area and the chosen target animal.
- For rodents, for example, it is preferable to place the device near and adjacent to the place where they come to feed.

### Recommendations for use

- Ultrasonic signals cannot pass through obstacles.
- Do not place an emitter behind furniture or curtains.
- Ultrasonic signals are reflected by smooth surfaces: they cannot pass through walls or floors.
- Ultrasonic signals are absorbed by soft or porous surfaces: rugs, carpets...

### IMPORTANT:

#### AN EFFECTIVE ULTRASONIC SIGNAL MUST BE:

- At the right frequency (Hz) to disturb the targeted pest.
- Intense enough (in dB) to disrupt their habits and their feeding and to make them change their territory.

Weitech devices have all been examined in laboratory conditions.

# ELECTRONIC PEST REPELLERS

## SOLID-BORNE SOUNDS:

### EFFICIENCY

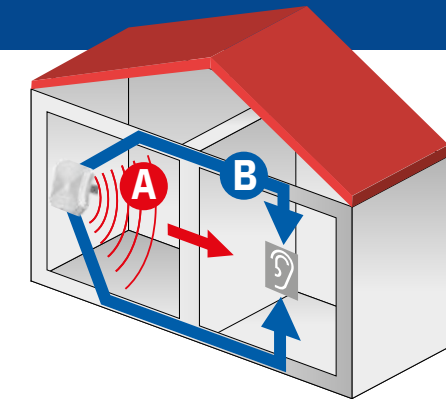

Structure-borne sounds are vibrations that propagate through solids and are assimilated by rodents as the sound of footsteps on the floor or any other approaching danger. Panicked, they feel a constant danger pushing them to hide. Exhausted by this permanent stress, they leave the premises generally within 72 hours and most often permanently for rodents. Allow 2 weeks for optimum results.

### Solid-borne sounds & vibrations

The propagation of solid-borne sound depends on the construction and acoustics of the building. Sound reaches the hearing in several ways. A distinction is made between airborne sound and solid-borne sound.

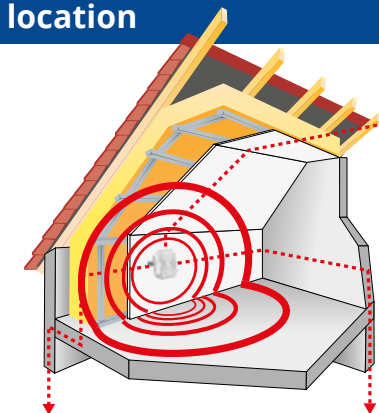

**A - Airborne noise** is caused by a sound source that makes the air vibrate: for example the human voice, music or the ringing of the telephone... When the airborne noise meets a wall, it vibrates and transmits the noise to the adjoining room. Airborne noise also travels through holes, cracks and gaps known as sound leaks.

**B - Solid-borne noise** is generally caused by machines: noise is transmitted through

all the walls of the machine to the adjoining construction elements, such as the floor and the ceiling. For example, a washing machine during the spin cycle. **Materials propagate sound differently: dense, solid, and heavy materials vibrate less than light, thin materials. They produce high noise levels while porous materials (foam or perforated products such as wood panels or plaster) absorb noise better.**

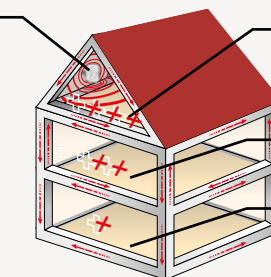

### Choice of location

A good installation is essential to obtain an optimal result. Position the device in an uninhabited room, identify a wall (floor, ceiling, wall) / beam likely to propagate the sound as far as possible. For example, the middle of a beam or the middle of the floor. The hearing of rodents being finer than the human ear, they hear it in the walls, partitions, insulation and in other rooms of the house, where the human ear no longer hears.

#### Case of a building with poor sound insulation

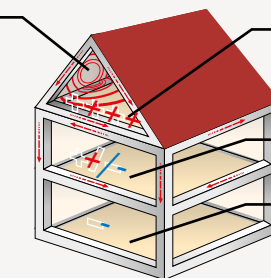

Installation of the device in the attic.

Sound travels very strongly all over the walls/floors/attic walls. The sound propagates strongly on the 1st floor. The sound propagates moderately on the ground floor.

#### Case of a building with good sound insulation

Installation of the device in the attic.

Sound travels very strongly all over the walls/floors/attic walls. The sound propagates very weakly on the 1st floor. The sound does not reach the ground floor.

# WEITECH EVOLVES AND RENEWS ITSELF!

## A NEW GRAPHICAL CHARTER

- ⊕ More **ATTRACTIVE**
- ⊕ More **IMPACTFUL**
- ⊕ More **CONQUERING**
- ⊕ More **VISIBLE ON THE SHELVES**
- ⊕ Totally **UNIQUE & DIFFERENT** from the others

## A STRONG IDENTITY IN LINE WITH OUR DEVELOPMENT AND CONQUEST INTENTION

- ⊕ **Clear identification of the targeted pest:** an impactful title + a big picture of the pest.
- ⊕ **Product presented in situation** for the better visual understanding of product purpose.
- ⊕ **Clear indication of the used technology:** vibrations, ultrasounds, UV LED...
- ⊕ **Relevant pictograms:** ecofriendly products - coverage area - outdoor or indoor products...

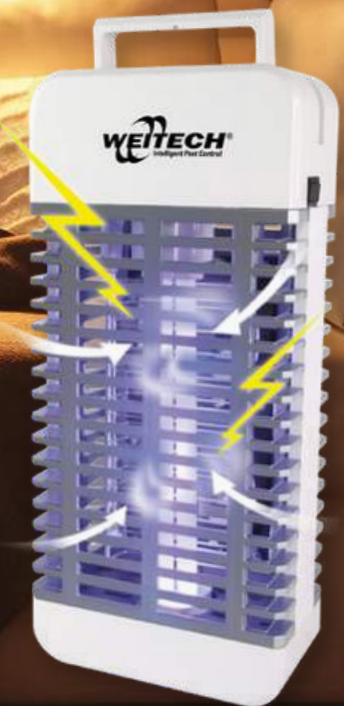

**NEW**

**U.V. LAMP INSECT KILLERS**

## FLYING INSECT KILLER WITH 2 FANS

**PROTECTS  
50 m<sup>2</sup>**

Box of 1 lamp with cord + cleaning brush  
**WK0116**

## ATTRACTIVE AND PERMANENT

Attracts, sucks and electrocutes flies, gnats, mosquitoes, tiger mosquitoes...  
Attracted by UV light, insects are immediately sucked in by the air flow caused by the fans. Once inside, they are electrocuted and therefore neutralized.

## PRACTICAL AND ECO-RESPONSIBLE

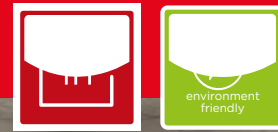

- Protects a maximum area of 50 m<sup>2</sup>.
- Plugs directly into the 220-240 V/50-60 Hz power socket.
- **Low power consumption (16 W).**
- Disassembles and cleans easily.
- Environment friendly: no chemical products or poisons.
- Dimensions: L. 15.5 x H. 34 x D. 8 cm.

NEW

ULTRASONIC &amp; ELECTROMAGNETIC REPELLERS

## CHASES AWAY RODENTS & CRAWLING INSECTS

Box of 1 device  
**WK1003**

## CHASES AWAY AND REPELS PESTS

- RATS, MICE & CRAWLING INSECTS from houses, flats, attics, cellars, garages, sheds, outbuildings...
- 2 in 1: Ultrasonic waves repel pests in the room and electromagnetic waves repel pests inside walls via electrical cables.

## EFFECTIVE INSIDE WALLS AND PARTITIONS

- Ultrasound prevents rodents from hearing any danger and disturbs the insects' sensory organs. Their habitat becomes undesirable, and they cannot adapt to the constantly changing frequency of the ultrasonic waves. Combined with the action of the electromagnetic waves, which annoy the pests wherever they hide, they are exhausted by this permanent stress and usually leave the premises in search of better conditions within 72 hours. Rodent movement will rapidly decrease. Count up 2 weeks for optimum results.

## PERMANENT PROTECTION

- Protects a maximum area of 60 m<sup>2</sup>.
- Plugs directly into a 220-240 V power socket.
- Device for indoor use with an operating indicator light and a nightlight function.

## ULTRASONIC REPELLERS MICE

INDOOR

Keeps pests away from your home, garage, loft... by emitting ultrasonic signals.

## Ultrasonic Pest Repeller

Mice, spiders and crawling insects

- Protects a maximum area of 45 m<sup>2</sup>.
- Device for indoor use with an operating indicator light.
- Plugs directly into a 220-240 V power socket.
- Emits ultrasonic signals round the clock.
- Effectiveness visible after 72 hours.
- Energy consumption: Maximum 1.6 W.
- Available separately for 45 m<sup>2</sup> (WK0523) or in a three-pack for 3 x 45 m<sup>2</sup> (WK3523).

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0523		Blister pack 1 pc	6 pcs	143	858
WK3523		Blister pack 3 pc	6 pcs	70	420

## Ultrasonic Pest Repeller with nightlight

Mice, spiders and crawling insects

- Protects a maximum area of 90 m<sup>2</sup>.
- Device for indoor use with an operating indicator light and a **nightlight function**.
- Plugs directly into a 220-240 V power socket.
- Emits ultrasonic signals round the clock.
- Effectiveness visible after 72 hours.
- Ideal for a child's room.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0190		Box 1 pc	6 pcs	60	360

## Ultrasonic Pest Repeller

Mice, spiders and crawling insects

- Protects a maximum area of 140 m<sup>2</sup>.
- Device for indoor use with an operating indicator light.
- Simply plugs into a 220-240 V power socket with its 2 meter power supply cable or operates with a 9 V battery (battery life +/- 3 days).
- Emits ultrasonic signals round the clock.
- Effectiveness visible after 72 hours.
- Energy consumption: 1.05 W.
- Several possible settings: rodents or insects.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0220		Blister pack 1 pc + 1 cable	6 pcs	78	468

# ULTRASONIC REPELLERS AND TRAPS MICE

**INDOOR**

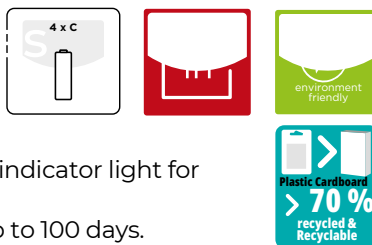

Chases away small rodents, spiders and many other crawling insects from your house.

## Ultrasonic Pest Repeller on batteries

Mice, spiders and crawling insects

- Protects a maximum area of 60 m<sup>2</sup>.
- Device for indoor use with an operating indicator light for vast places: attic, basement...
- Battery operated (4 x "C"). Battery life up to 100 days.
- Emits ultrasonic signals round the clock.
- Effectiveness visible after 72 hours.
- Operates intermittently to reduce power consumption.
- Ideal for places with no electrical power supply (garden shelters, lofts, cellars, holiday homes...).

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0240		Blister pack 1 pc6	pcs 78		468

Usable to fight against invasions of rodents. Use gloves not to arouse rodent mistrust and place traps on the passage of rodents. Pick up the traps every 24 to 48 hours. Eliminate the catches and then set the traps with a bait.

## Traditional wooden trap

Mice

- 2 traditional traps: mouse pads with wooden base.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK4000		Blister pack 2 pcs30	pcs 98		2940

## Metal trap cage (one-way)

Mice

- Metal trap cage with wooden base. Length 12 cm.
- Convenient to install, easy to use.
- Safe lock design, mice can not escape after trapped.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal

# ELECTRONIC REPELLERS RATS, MICE

**INDOOR**

Keeps pests (mice, rats...) away from your home, garage, loft... and prevents any re-infestation.

## Ultrasonic & Electromagnetic Repeller

Rats, mice and crawling insects

- Protects a maximum area of 60 m<sup>2</sup>.
- Effective inside walls and partitions.
- Emits ultrasounds which disturb the hearing of rodents and the sensory organs of crawling insects.
- Creates an electromagnetic field through the wall which disturbs pests and scares them away.
- Effectiveness visible after 72 hours.
- Preventive, curative, and long-lasting performance.
- Nightlight option with light sensor.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK1003		Box of 1 device	6 pcs	81	486

## Solid-borne sounds and vibrations Repeller

Rats, mice, dormices, garden dormices and lizards

- Protects a maximum area of 150 m<sup>2</sup>.
- Emits solid-borne sounds which are the vibrations that propagate through solids and are assimilated by rodents as footsteps on the floor or any other approaching hazard. Panicked, they feel a constant danger pushing them to hide. Exhausted by this permanent stress, they leave the place.
- Designed for heavily congested and hard-to-reach areas.
- Dislodges rodents from various holes, cavities and hiding places.
- Device for indoor use - To be fixed or screwed on structure, the framework or the partition.
- To be installed in an uninhabited room: attic, cellar, shelters garden...
- Works intermittently.
- Plugs directly to the 220-240 V power socket - Fixing lugs, screws and cable of 10 meters supplied.

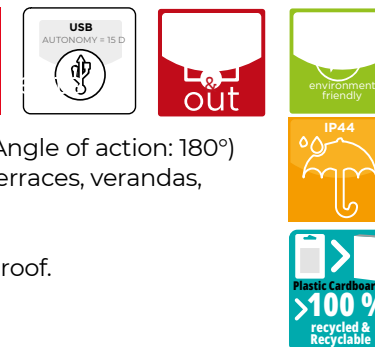

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0400		Box of 1 device with fixing lugs and screws + 1 cable of 10 m	4 pcs	72	288

## Ultrasonic Pest Repeller

Rats, mice, dormices, garden dormices and crawling insects

- Protects 80 m<sup>2</sup> (Maximum distance: 7 meters – Angle of action: 180°)
- Device for indoor and outdoor use: home, attic, terraces, verandas, surrounding houses, backyard, chicken coops...
- Permanent Action - Adjustable intensity.
- Autonomy: 15 days - USB Charging - IP44 waterproof.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal

# ULTRASONIC REPELLERS RATS, MICE

**INDOOR**

Chases away rodents, spiders and many other crawling insects from your house.

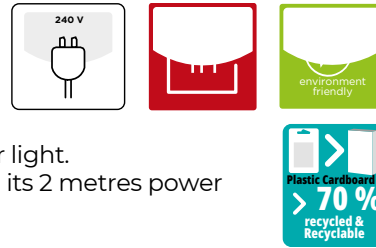

## Ultrasonic Pest Repeller

Rats, mice, spiders and crawling insects

- Protects a maximum area of 280 m<sup>2</sup>.
- Device for indoor use with an operating indicator light.
- Simply plugs into a 220-240 V power socket with its 2 metres power supply cable.
- Emits ultrasounds and infrasounds.
- Visible effects after 72 hours for small rodents and insects; 2 weeks for rats.
- Several possible frequencies.
- 2 loud-speakers - Audible on some settings.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0300	5 414099 233006	Blister pack 1 pc + 1 cable	6 pcs	120	720

## Professional Ultrasonic Pest Repel

Rats, mice, fleas and crawling insects

- Protects a maximum area of 325 m<sup>2</sup>.
- Device for indoor use with an operating indicator light.
- Simply plugs into a 220-240 V power socket with its 2 metres power supply cable.
- Emits ultrasounds and infrasounds.
- Visible effects after 72 hours for small rodents and insects; 2 weeks for rats.
- Panel of various settings options - Audible on some settings.
- To use in warehouse, attics, cellars.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal

# PEST REPELLERS CATS, DOGS, RABBITS, HERONS

**OUTDOOR**

Chases away cats, dogs, rabbits, foxes, beech martens, herons from your garden, patio.  
Operation: when an animal approaches, an infra-red movement detector triggers ultrasonic emissions which frighten the animal and drive it away.

## Garden Protector 2 + flash

Cats, dogs, rabbits, foxes, beech martens, herons

- Protects a maximum area of 200 m<sup>2</sup> detection angles: 90° over a maximum distance of +/- 15 m.
- Works with 4 "D" (LR20) batteries or on the mains via the WKT052/WKT052-OUT adapter (optional accessory).
- 7 adjustable ultrasound frequencies depending the targeted animal (14.3 to 25 kHz) presence of a flash with (on/off) switch makes the device considerably more effective.
- Flash to chase animals away.
- Delivered with supports for easy assembly.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0052		Box 1 pc + 2 supports	6 pcs	72	432

## Garden Protector 4 + flash

Cats, dogs, rabbits, foxes, beech martens, herons

- Protects a maximum area of 200 m<sup>2</sup> detection angles: 90° over a maximum distance of +/- 15 m.
- Works with 4 "D" (LR20) batteries or on the mains via the WKT052/WKT052-OUT adapter (optional accessory).
- 7 adjustable ultrasound frequencies depending the targeted animal (14.3 to 25 kHz) presence of a flash with (on/off) switch makes the device considerably more effective.
- Flash to chase animals away.
- Delivered with supports for easy assembly.
- Waterproof IP44.

# PEST REPELLERS CATS, DOGS, RABBITS, HERONS

**OUTDOOR**

Chases away cats, dogs, rabbits, foxes, beech martens, herons from your garden, patio.  
Operation: when an animal approaches, an infra-red movement detector triggers ultrasonic emissions which frighten the animal and drive it away.

## Garden Protector Solar

Cats, dogs, rabbits, foxes, beech martens, herons

- Protects a maximum area of 75 m<sup>2</sup> detection angles: 120° with a range of up to 8 m.
- The movement detector triggers the ultrasonic signal emitter which disturbs the targeted animals.
- Solar product. The rechargeable batteries can be replaced.
- 3 adjustable ultrasound frequencies (14 to 25 kHz).
- Sensitivity of the detector can be adapted.
- Waterproof IP44.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0053		Blister pack 1 pc6 pcs		94	564

## Garden Protector 3

Cats, dogs, rabbits, foxes, beech martens, herons

- Protects a maximum area of 200 m<sup>2</sup> detection angles: 90° over a maximum distance of +/- 15 m.
- Works with 4 "D" (LR20) batteries or on the mains via the WKT052/WKT052-OUT adapter (optional accessory).
- **7 adjustable ultrasound frequencies.**
- Delivered with a stake for easy assembly.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0055		Box 1 pc + 1 stake	6 pcs	50	300

Keeps pests away by emitting sound waves within a radius of 3 to 4 m around the device. Protects the garden, car, garage, bins from nuisances.

## Animal Repeller

Dogs, cats, foxes, rodents

- Protects a maximum area of 40 m<sup>2</sup>.
- 360° coverage around the device.
- Rechargeable by USB (30 day battery life).
- Is audible as the device emits different frequencies.
- Waterproof IP44.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0100		Box 1 pc + 1 support + 1 USB cable + 4 screws + 1 sticky tape	6 pcs	108	648

# PEST REPELLERS SNAKES, MOLES, ANTS

OUTDOOR

Protects your gardens, grounds, from snakes, lizards.

## Solar Snake Repeller

Snakes, lizards

- Protects a maximum area of 450 to 650 m<sup>2</sup>.
- Operates with 1 built-in solar panel (no batteries needed).
- Produces vibrations that snakes perceive as earthquake, they leave the area.
- To be inserted in the ground.
- Ideal to protect the garden.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK2030		Box 1 pc	6 pcs	40	240

Protects lawns, flowerbeds and vegetable gardens from ant invasions and nesting.

## Solar Vibration Repeller

Ants

- Covers 400 m<sup>2</sup> x 2 = 800 m<sup>2</sup>.
- Works with a solar rechargeable battery and operates 24h/24.
- Produces sequential sounds and vibrations - Every 27 seconds, it emits a 3-second signal causing vibrations in the soil.
- Designed to withstand normal exposures to rain, snow and sprinkler systems. • Should be set up near to the anthill.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK2017		Box of 2 devices	6 pcs	90	540

Repels moles and burrowing rodents from gardens and vegetable gardens.

## Sunflower Repeller dual pack

Moles, burrowing rodents

- New technology and material with improve the efficiency.
- Quality solar panel, which produces bigger power storage, enhanced charging speed.
- New design shaped like a flower to decorate the garden as well as protecting it from moles. • Solar panel at 45° to ensure an optimal loading of the product.
- Specially for rough terrain with trees, roots, stones... (dual unit package).
- Protects a maximum area of 400 m<sup>2</sup> - Operates with 1 built-in solar panel.
- Produces a sequence of sounds and vibrations - To be placed directly in the

- > Working time: 5 seconds every 20 seconds.
- > Output: 3 V.
- > Current: 100 mA.
- > Solar panel: polycrystalline.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK2018		Box 2 pcs	6 pcs	84	504

# PEST REPELLERS MOLES

OUTDOOR

Repels moles and burrowing rodents from gardens and vegetable gardens.

## Mole Repeller Solar

Moles, burrowing rodents

The Weitech mole repeller works with a solar rechargeable battery. The device operates continuously during the day and night. Every 20 seconds it emits vibrations in the ground for 2 seconds. This disorients moles and voles in their search for food and they leave the network of tunnels to settle in a less hostile environment.

- Protects a maximum area of 350 m<sup>2</sup>.
- Operates with a built-in solar panel.
- Produces sequential sounds and vibrations.
- Should be set up near to mole hills.

Reference	EAN13	Packaging	Master Carton	Qty MC/pal	QTY pc/pal
WK0677		Box 1 pc	10 pcs	25	250

## Solar Repeller (mini) dual pack

Moles, burrowing rodents

- Specially for rough terrain with trees, roots, stones... (dual component package).
- Protects a maximum area of 400 m<sup>2</sup> - Operates with 1 built-in solar panel.
- Produces a sequence of sounds and vibrations - To be placed directly in the tunnel.

- > Working time: 2 seconds every 30 seconds.
- > Output: 2 V.

## Mole Repeller - On batteries

Moles, burrowing rodents

When placed in a mole or vole tunnel, the Weitech emits sound waves which cause 125 dB vibrations in the ground. These disrupt the nervous system. Disturbed in their feeding habits, the animals quickly move away. They do not get accustomed to the Weitech repeller. The device emits vibrations for 1 second every 5 seconds, i.e. almost 14,500 times per day.

- Protect a maximum area of 100 m<sup>2</sup>.
- Works with 4 «D» (LR20) batteries.
- Produces sequential sound up to 125 dB.
- It is placed directly in the tunnel.
