GRIDMATRIX

UNIVERSALLY COMPATIBLE WITH ANY SENSOR

REAL-TIME AND HISTORICAL DATA

ACTIONABLE INSIGHTS WITH DATA VISUALIZATION

NO NEW HARDWARE

CROSS-PLATFORM DATA ANALYSIS

24/7 ACCESS FROM ANYWHERE

MADE IN THE USA

SOC II CERTIFIED

ABOUT US

Our founders noticed a shift in how cities have the increasing need to collect data to understand their roadways, for the sake of the environment, efficiency, and people's well-being. From this shift, GridMatrix was born. It was created on the principle: **data is good, *insights are better*.**

WHY CHOOSE US?

Our cloud-based, universal compatibility platform provides data without the need to procure new, costly hardware, by leveraging what your city already has. Our suite of analytics offer real-time data that is unmatched on accuracy and price.

Save Lives
Our software detects vehicular/pedestrian near-misses and collisions, as well as offers real-time alerts.

Reduce Congestion
Our software pinpoints the root causes of a city's busiest streets and roadways.

Cut Emissions
Our software calculates CO_2 emitted and gas consumed, comparing each intersection to highlight trouble areas.
