Roughing-In

Minimum Standard cabinet Size required

Sink Size	Minimum Cabinet Size
36"	36"
33"	33"
30"	30"
24"	24"

Ensure clearance for faucet installation

Note: Please consider these details before you choose your cabinet, for standard size cabinet modifications may be required.

INSTALLATION INSTRUCTIONS

Please Note:

The step-by-step guideline below is a general reference for installing the Zuhnë Farmhouse Sink. Please keep in mind that this is a custom installation. Zuhnë cannot be liable should there be any discrepancies with your installation. Zuhnë recommends installing all Zuhnë products by hiring a licensed, professional plumber.

STEP 1: Choose your Mounting Style

INSTALLATION INSTRUCTIONS

PRODUCT INFORMATION	<div><div>Apron Reveal Options</div><div><div><div><div><div>4 1/4"</div><div>19 3/4"</div><div>Sink side</div><div>Sink Apron</div><div>3/4"</div></div><div>Flush Apron</div></div></div><div><div><div><div>5 1/4"</div><div>18 3/4"</div><div>Sink side</div><div>Sink Apron</div><div>1 3/4" Max Extension</div></div><div>Extended Apron</div></div></div></div></div>
INSTALLATION INSTRUCTIONS	<div><div>STEP 2: Measures for Supports</div><div><p>Measure the "true" height of the sink, from where the top aligns with the countertop surface to the bottom of the sink's sides, which will rest on the supports. Transfer this measurement to the interior cabinet sides and mark a level line from back to front. This is where the supports will be added to carry the weight of the sink.</p></div></div>
CARE AND MAINTENANCE	<div><div>STEP 3: Install the Supports</div><div><p>There are many ways to install the supports on the cabinet, the main task is to create a support frame inside the base that the sink will sit upon. We recommend the use of 2x4 solid wood studs to create the support frame. The frame should be strong enough to hold up to 300 lbs. of weight once installed. The support frame should be positioned so that the top of the sink is level and flush with surface of the cabinet perimeter. Make sure that the support frame leaves room for the drains, faucet water lines and if there is one, a garbage disposal.</p></div></div>
SUPPORT AND WARRANTY	<div><div><p>On each cabinet side, install 2x4 supports. Position the tops of the supports so that they are even with the level lines. Use construction adhesive and 1-5/8" square-drive deck screws to attach the supports. First, apply the adhesive then clamp the supports firmly in place, then drive the screws through the cabinet sides into each support.</p><p>Note: While the above method for supports is suggested, a professional plumber may use his discretion for methods available to him.</p></div></div>

STEP 4: Cut the Cabinet Front

Measure the height of the sink front, and add 1/8" to this dimension when you mark the base cabinet front cutout. This allows the sink to rest just above the cut edge, without being supported by it. Depending on your base cabinet, it may be necessary to remove the doors and replace them with smaller doors. Use a jig saw to cut out the sink-front opening.

STEP 5: Install the Sink

Test-fit the sink in the opening. The entire weight of the sink should be carried by the side supports. Check that the sink is level from side to side and front to back. If necessary, add tapered wood shims to adjust.

Install the sink and use silicone caulk to fill in the gaps below the sink front, and between the sink and countertop.

CARE AND MAINTENANCE

You have purchased a premium product that is guaranteed to last a lifetime if proper care is taken.

DO NOT

- Leave standing water in the sink. Keep the sink clog-free at all times.
- Use abrasive cleaning materials such as steel wool that may scratch the surface.
- Use industrial grade or acid-based cleaning solutions that can damage the sink’s surface or finish.
- Leave corrosive or rust-prone materials such as metal utensils or cookware for long periods of time in the sink.
- Leave any cleaning materials or household cleaning agents or bleach for long periods of time in the sink.
- Leave water spots on the sink. Clean and towel-dry the sink after every use.
- Use a sharp object such as a knife directly or indirectly on the sink.
- Rub or scrub against the direction of the grain lines on the sink.

CLEANING

- Clean the sink daily using mild soap and warm water. Wipe the sink dry after every use. Rub lightly in the direction of the grain lines.
- Use a mixture of vinegar and water if you find mineral deposits on the sink. Rinse the sink thoroughly if vinegar or other cleaning solutions are used.
- Stubborn stains may be removed using mild abrasive cleaners such as Bar Keepers Friend.
