

EM[®]

Animal

EM[®] Animal is a proprietary combination of natural microorganisms designed to improve the health and vitality of stock.

Improve animal performance | Enhance gut micro-flora | Increase the vitality of the animal
Decrease dung odour | Improve nutrient uptake | Increase feed conversion rates
Increase fecundity | Reduce stress factors | Reduce pathogenic bacteria in the faeces

EM[®] Animal is an innovative animal probiotic which is based around our core EM[®] product and then given an additional boost of lactobacillus bacteria. EM[®] Animal is to be used to help maintain healthy stock and decrease vet bills.

The use of EM[®] Animal has shown to improve vitality of animals, decrease vet costs and improve the feed

intake of the animals. Tests have shown that due to regular use of EM[®] Animal positive microorganisms are cultivated in the gut - this strengthens the immune system and thus the animal's resistance. Vitalised and healthy animals lower your operational costs, whilst at the same time an increase in appetite combined with greater feed conversion leads to increased profitability.

COMPOSITION

Ingredients: EM[®] Animal contains Effective Microorganisms, additional lactobacillus bacteria and pre and probiotic substances.

“Stock are just so much happier and healthier”

- Tim Hawke
Canterbury Sheep and Beef Farmer

OTHER:	For sheep, lambs, Goats, Pigs, Horses or other animals use 1-2mls per 20kgs daily.

Call EMNZ for specific crop recommendations.

ABOUT EMNZ

We manufacture microbial products based on EM technology. EM is a unique combination of bacteria, yeasts and fungi used to activate and balance the naturally diverse microbiology in nature. EMNZ is a company focused on developing sustainable products for New Zealand, selling products to the agriculture, viticulture, and horticulture industries. Our philosophy is to promote the use of microbial products to boost production. EMNZ work with both biological and chemical based systems to enhance rather than negatively impact the environment.
