HZC PREMIUM RAPID 30T LOG SPLITTER
Lifter Version (Briggs & Stratton 6.5HP)

1 DESCRIPTION

HZC 30T Premium Rapid Lifter Log Splitter is a powerful tool for efficiently splitting Australian logs into firewood. It provides 30 tonnes of splitting force and is powered by a Briggs & Stratton 6.5Hp engine, making it compatible and suitable for most Australian hardwoods. The log splitter comes with a hydraulic cylinder and it can accommodate up to 600mm in log length. It is also designed with 2-Stage pumps allowing for maximum speed at low pressure, automatically reducing to a safe speed when splitting wood.

Furthermore, HZC 30T Premium Rapid Lifter Log Splitter is designed with convenience in mind. Equipped with a high-performance axe head, It is much easier to split wood. A hydraulic lifting platform loading device can lift the heavy logs to the working height by hydraulic operation handle. It also comes with a lifter and a rear support leg, and an 8-inch jockey wheel which would enhance the stability and easy maneuverability.

2 SPECIFICATIONS

- Max. Wood Splitting Capacity: **30T**
- Max. Wood Splitting Diameter: **500mm**
- Max. Splitting Length: **600mm**
- 2-Stage Pump: **13.0/3.0 (15GPM)**
- Cycle Time: **9s**
- Weight: **340kg**
- Shipping Weight: **400kg**
- Package Dimension
 - Length: **2200mm**
 - Width: **870mm**
 - Height: **1160mm**

3 FEATURES

- Briggs & Stratton 6.5Hp Engine:** Ensures high endurance and power for efficient wood splitting.
- 30 Tonne Splitting Force:** Efficiently splits even the hardest Australian hardwoods.
- 9s Wood Splitting Cycle Time with Auto Return:** Provides rapid splitting and increased productivity.
- Hydraulic Lifting Platform:** Allows easy lifting and positioning of logs, reducing physical strain.
- Compact Width:** The design enables easy transportation by rotating the beam parallel to the fuel tank.
- 2-Year Engine Warranty and 2-Year Machine Warranty:** Ensures machine and service quality

8 SPLITTING HOURS NON-STOP
