Sit and Stand Workstation,
easy crank up high

These standing desks of are manually adjustable and enable their user to work both seated and standing. These desks all have a hand crank with which their height can be adjusted. Studies have shown that switching between sitting and standing significantly reduces the risk of RSI.

We introduce a high quality product, Sit stand desk with manual height adjustment table. so we can also call as height adjustable table or adjustable height desk. this height adjustable table can adjust the height of table or desk ergonomically.

features:

- User can adjust the height of the table top to get an ergonomic working position.
- you feel and work more creative when you will be able to change the positions sit and standing.
- The Table top gives a generous work surface that is durable, stain resistant and easy to keep clean.
- Adjustable: hand crank
- Height: 725 – 1190 mm
- Width: 1350 – 1750 mm
- Depth tabletop carriers: 700 mm

Ergonomic Furniture for your healthy protection

No crossbar can be easy access by wheelchair users

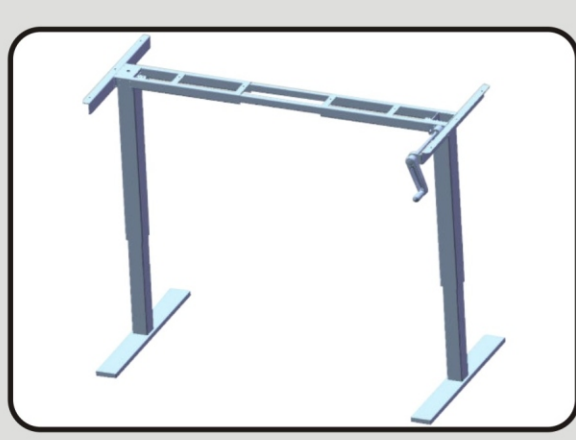

Solid construction, with no noticeable vibrations or squeaks

Hideaway adjustable hand crank; can be removed completely. Cranking motion is very smooth and easy.

Can be used anywhere

Single fingertip control release
lever makes height adjustable
worksurfaces easy to use and
operate

Tabletops feature spacious (3" diameter), fully laminated grommet holes for cable pass-through, or for easy insertion of elegant power socket modules. 3D lamination gives your desktop the appearance of being extravagantly crafted from a solid piece of hardwood.

tabletops are built around a 1-1/8" core of high-density MDF. The edges and corners of the tabletop are computer-contoured to create an elegant, yet ergonomic "comfort edge." This process has the added benefit of rounding off those sharp corners that are unavoidable with standard, "PVC edge-banded," rectangular tabletops.
