One touch, you can switch your position to sitting or standing. Pneumatic arm that provides effortless movement - you simply raise or lower the platform with one touch of the lever. You can easily adjust the standing desk to match your exact height requirements.

ERGO RISER DESK RD

The dual platform design oVers an upper platform for monitor or laptop, and a lower platform for keyboard and mouse.
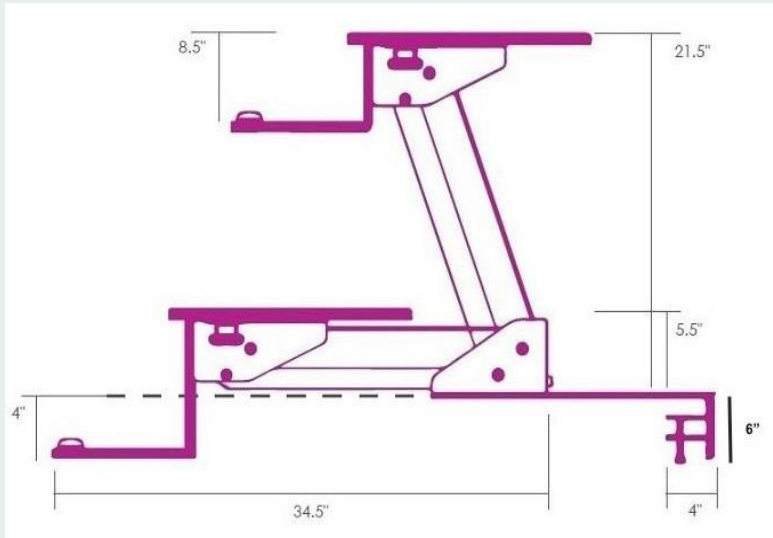

Follows Ideal Ergonomics as keyboard platform is little lower while sitting position. Optional Monitor arm available to position monitor at eye level
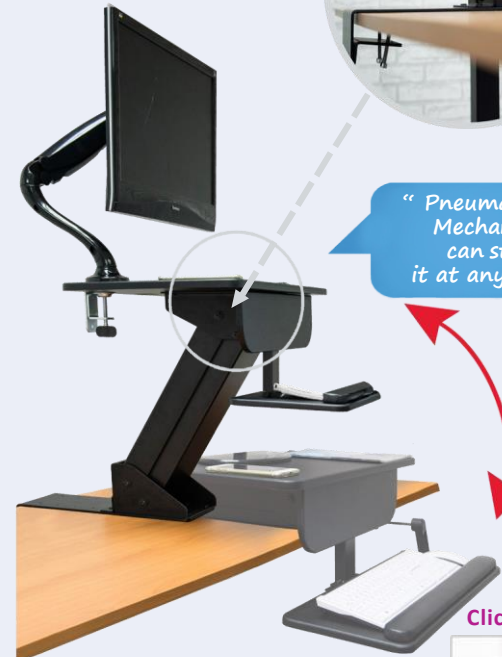

ERGO RISER DESKRD

About Product

The Riser Desk RD sit-to-stand workstation is a quick and easy way to convert convert any traditional desk into a height adjustable one. Its remarkably stable as compared to any sit stand desk solution available in the market and has unique breaking system to stop at any level. The Sit to Stand platforms can be easily adjusted from sitting to standing positions simply by pressing the lever underneath the upper platform and moving the unit up or down to your desire height. The pneumatic height adjustment system allows the Lift to lock in place whenever you let go of the lever, so you can leave it at any height within it 16" vertical range.
