

Self adhesive bituminous tape

Protects the joists from moisture and prolongs the service life.

Made In France

Application & Use

Designed to protect joists against moisture and rainwater and thus increase the life of the terrace. 100% waterproof band.

Place the tape on a dry and clean support.

Technical Characteristics

Composition : bitumen, aluminum foil, silicone protection

Color : black

Origine : France

Garantie : 10 years

Conformity : norm DTU 43.1

Dimension : 7,5 cm x 20 ml

Thickness : 1,1 mm

Resistance to temperatures : from -40°C to +80°C

Resistance to atmospheric agents : UV and freeze

Product Advantages

- + Adheres to most building materials (wood, plastic, glass, concrete, metal)
- + 100% waterproof: ideal for wood, roof, piping, framing, etc.
- + Robust, the band is tear-proof and non-deformable
- + Reduced resonance when walking on the terrace
- + Protects and extends the service life of the joists structure
- + Ensures watertightness of the structure against moisture and rainwater runoff
