

- Notes:
- 1) 48x48 unit only needs 57-1/2" square support array
 - 2) 48x96 unit needs 112-1/2" min length, or two 57-1/2 squares for ease of storage later as shown
 - 3) Standard 2x lumber shown
 - 4) Arrange center supports as desired: 11-1/4" on center generates roughly even spacing
