makers**

HANDPANCARE

For players and makers

About us: We are a group of musicians, makers and visionaries with over 15 years of handpan experience. Therefore, we know the struggles handpan players face in their day to day lives, especially when travelling with their instrument. We have made it our goal to develop the highest quality handpan accessories. Our assortment of products includes hard and soft cases, protective coating, wall mounts, macrame braids and many more.

“An important part of the right care is the right tool.”

HANDPAN CASES

FIBERGLASS HARDCASE (HARD)

FEATURES

- Stainless steel locks; weather- and splash proof
- Available in 9 different colors
- Outer shell made of fiberglass, fine foam coating inside
- Including backpad, also compatible with backpack carrying system

Size	61x61x32cm
Material	Fiberglass, foam, metal
Weight	3.9kg
Hardness	Hard
Colors	Blue, green, red, white, black, silver, carbon look, pink, gold,

The fiberglass hardcase is the classic among our cases. The material makes it very sturdy while retaining a relatively low weight. Also, it can be easily worn as a backpack (straps and backpad included, for even more comfort also compatible with the backpack carrying system, pg. 11). It is available in a wide range of colors and is splashwater-resistant. The inner coating of foam guarantees that no pressure is exerted on the notes at any time. Also, the foam is partially removable around the edge, which allows for the transport of larger handpans.

PU ZIPPER CASE (SEMIRIGID)

FEATURES

- Perfect for day to day use
- Stainless steel zipper; weather- and splash proof
- Very light (2.9kg), easy to carry
- Semirigid - outer shell made of PU, fine foam inlays inside
- Comfortable to wear - integrated backpad

Size	61x61x32cm
Material	Polyurethane, foam, metal
Weight	2.9kg
Hardness	Semirigid
Colors	Black, red, blue

The PU zipper case offers good protection at a budget price. The elegant design is similar to our fiberglass hardcase, but the surface is textured. Thanks to the integrated backpad and included straps, you can wear it as a backpack comfortably. Due to the stainless steel zipper, inserting and removing your handpan is very simple and quick, which makes it the perfect case for day to day use. It comes with two fine foam inlays which hold the instrument in place and ensure that no pressure is exerted on the notes.

OUTDOOR HANDPAN BACKPACK (SOFT)

FEATURES

- Perfect for hiking, festivals and backpacking
- The innovative backpack system ensures maximum carrying comfort
- Ultra light (1.6kg)

Size	57×57×30 cm
Material	Polyester, polyamide
Weight	1.6kg; 2.65 kg (incl. Top-Protection)
Hardness	Soft
Color	Black with red highlights

This outdoor handpan backpack is the result of a cooperation between HandpanCare and Deuter. Its low weight and comfortable backpack system make it the perfect backpack for hiking, backpacking or festivals. The included top protection (removable) made of ABS plastic protects the notes of the instrument on the side not covered by your back. There are pockets for additional storage on the back, on the sides and in the back straps.

HANDPAN TROLLEY FIBERGLASS (HARD)

FEATURES

- Perfect for airplane and train travel
- Extendable handle, up to 76.5cm
- Compatible with the backpack carrying system
- Soft inner foam
- Includes backpack straps

Größe	61x61x32 cm, handle extendable up to 76.5cm, total height with handle 123cm
Material	Fiberglass, metal, foam
Weight	5.9kg
Hardness	Hard
Color	Black

The fiberglass trolley with its extendable handle and wheels is perfect for plane and train travelling. It is compatible with the backpack carrying system (pg. 11). The butterfly locks are similar to the fiberglass hardcase.

ABS FLIGHTCASE (VERY HARD)

FEATURES

- Perfect for flying with your handpan
- ABS outer shell for maximum protection available
- The sturdiest case available
- Extendable pulley and wheels

Size	72x70x40 cm, total height with handle 102cm
Material	ABS, fine foam
Weight	15 kg
Hardness	Very hard
Color	Black

The ABS flightcase provides the best safety you can get for plane travels. Its outer shell is very thick and made of ABS, which is an extremely hard type of plastic. With this case, you will never have to worry about checking in your handpan as luggage again.

CARBON HARDCASE (VERY HARD)

FEATURES

- Made of real carbon fiber
- Premium protection at a low weight
- Classy textured black surface
- Fine inner foam

Size	61x61x32 cm
Material	Carbon fiber, foam
Weight	2.9kg
Hardness	Very hard
Color	Textured black

The brand new carbon fiber hardcase is the premium version of the product line. Thanks to the carbon fiber material, it is even more sturdy than the fiberglass case, while the weight is lower. The surface is a elegant-looking textured black - perfect for professional players and musicians with high demands. It is compatible with the backpack carrying

HANDPAN CASE ACCESSORIES

TOP-PROTECTION

Size	Ø59cm
Thickness	4mm
Material	ABS
Weight	0.95 kg
Designed for softcases, like our Outdoor Backpack	
Removable fine foam inner layer	

This top protection made of ABS is designed for transporting your handpan inside a softcase.

One top protection is included with our outdoor hiking backpack, but you can also use a second one. This helps with transporting smaller instruments

When using a softcase instead of a hardcase, the top protection helps to relieve pressure on the notes and protect the side of the instrument that is not covered by your back.

The inner layer of fine foam is removable.

FINE FOAM

Size	Ø63.5cm, thickness: 2cm
Material	Foam
Weight	0.1kg

This fine foam pad helps to keep your instrument in place and protects it from scratches. It fits perfectly into our top protection and helps to ensure a good fit inside the case.

Also, it can be used to keep smaller instruments in place inside a hard- or softcase.

BACK PADS

Size	36x23x2cm
Material	Foam
Color	Black

This comfortable back pad now comes with the fiberglass hardcase, but can also be ordered separately for older models.

It is self-adhesive, so it requires no additional glue.

BACKPACK CARRYING SYSTEM

Size	48x29cm, belt max. 133cm, back straps max. 89cm
Material	Nylon, metal, foam
Weight	0.75kg
Compatible with fiberglass hardcase, carbon fiber hardcase and fiberglass trolley	

This backpack carrying system is an addition to the fiberglass hardcase, carbon fiber hardcase and fiberglass trolley to make them even more comfortable to carry. The shoulder straps and waist belts are adjustable.

Three thick foam pads in the shoulder and waist area make it very comfortable to wear on your back.

The shoulder straps are adjustable up to a length of 89cm, the waist belt up to a maximum of 133 cm. It can be mounted to the hardcase with stainless steel snap hooks (included).

Additionally, there is a built-in pocket, which can be opened with a zipper on the side.

TURTLECARE

FEATURES

- TurtleCare ceramic coating
- Protects from corrosion, dirt, humidity and salt
- Specially developed for handpans
- Unlike oil, there is no negative effect on the overtones
- Keeps the sound of the handpan
- Transparent, odorless, does not leave stains
- High temperature resilience (-40 bis 750°C)
- Available in 100ml and 300ml bottles

TURTLECARE - THE BEST CARE FOR YOUR HANDPAN

TurtleCare ceramic coating is a special care product for handpans. **IMPORTANT:** TurtleCare is not an oil!

For the application we recommend a microfiber cloth or another dry cloth. Apply a few drops on the Handpan and spread it evenly on the surface (best with a non-absorbent cloth). The liquid leaves a protective layer on the instrument.

This ceramic film is highly temperature resistant; temperatures of 300-400°C in the oven are no problem - our tests with nitrided steel show that burning the instrument with TurtleCare allows for interesting color gradients. After the final fine tuning, the instrument can be treated with TurtleCare before it goes on its way to the customer.

ACCESSORIES

WALL MOUNT

Size	21×21×15 cm
Material	Wood, cork, rubber, metal
Weight	0.75kg

A fully assembled wall mount made of wood and cork, the best way to put your handpan on display safely. The installation can be done in minutes and requires only two screws and dowels (included).

HANDPAN STAND

Size	50cmx40cm
Material	Bamboo, rubber
Weight	1.45kg

The bamboo handpan stand can be assembled and disassembled quickly without screws, which makes it very useful for home use as well as travelling.

It is made of durable bamboo, and the rubber strip guarantees that your handpan will not be scratched or slip.

TRIPOD X-STAND

FEATURES

- Height-adjustable tripod
- Made of stable, lightweight aluminium
- Hard foam caps
- Spirit level for levelling
- Play standing up or sitting down
- Does not dampen frequencies
- No irritating noise when playing

The X-Stand is the result of years of development. Thanks to the aluminium material, it is very light while not losing any stability. The height is adjustable between 60 and 106cm. In the middle, there is a small spirit level for levelling.

Because of the hard foam caps, the handpan rests safely, while no frequencies are dampened. This makes it very useful for studio recordings. Due to the adjustable diameter, it is compatible with basically all sizes of handpans.

CARRYING BAG

- Available separately or as a bundle
- Perfect for transporting the X-Stand
- Black with red highlights
- With carrying handle

BAMBOO TRIPOD

FEATURES

- Lightweight tripod
- Natural stability due to bamboo
- Hard foam caps
- Available in 2 sizes
- Play standing up or sitting down
- Does not dampen frequencies
- No irritating noise when playing

This handpan tripod made of bamboo is available in two sizes, one for sitting down and one for standing up. The angle can be adjusted with the stainless steel metal joint in the middle.

Similar to the X-Stand, the hard foam caps ensure that no frequencies are dampened and that there is no irritating noise.

Bamboo is an extremely sturdy material, even harder than most hardwoods. This gives the tripod natural stability.

HELMHOLTZ CYLINDER

Size	Ø62mm, 11cm long
Material	Wood, rubber
Weight	0.15kg

This cylinder made of milled beech wood can be put into the hole ("Gu") to dampen some frequencies. By cutting the rubber or sawing the wood to a certain length, you can define the frequencies to be dampened - this allows to build notes like Bb4. The rubber can also be used double to fit larger holes. Also, it increases the bass of the handpan.

LED EDGE PROTECTION

Coming soon!

Size	Standard handpans (53cm without rim, ± 2cm)
Material	Plastic
Color	Several

The LED edge protection gives your handpan a futuristic look. Using a button, you can change the color of the LED lights.

It is powered by 2 AA batteries.

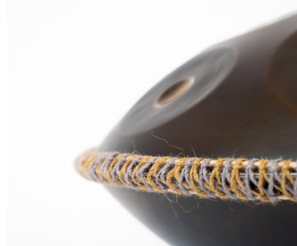

MICROFIBER CLOTH

Microfiber cloth for handpan cleaning	
Washable at 30°-60°C (no detergent)	
Absorbs oil and dust particles	
Size	35x35 cm
Material	Polyester, polyamide

After playing, tiny particles of oil and grease remain on the handpan. We recommend cleaning the instrument after every playing session.

MACRAME ROPE BRAIDS

Length	70cm (incl. 10cm fastener)
Material	Polyester and jute
Color	Several available
Visual enhancement and edge protection	

Our macrame rope braids are a simple, stylish way to give some personality to your handpan. Also, they offer a little bit of protection around the edge. Depending on the color, they are made of polyester or jute.
