

SNUGS WORKPLACE HEARING PROTECTION

Protecting your employees ears

100% Compliance,
100% Comfort guaranteed

 **snugs**®
Custom-fit
Hearing Protection

KEEPING UP WITH LEGAL COMPLIANCE

In work environments, safeguarding your hearing health is essential. Hearing loss and Tinnitus are common workplace injuries, that are preventable.

Employers have a responsibility to provide hearing protection that is used correctly, all day, every day and protects their employees' when the workplace noise is above 80 decibels (dB).

Whether it is on a construction site, in a noisy office or a bustling factory, by providing proper hearing protection, employers can ensure that their employees ear health is protected.

CUSTOM FITTED HEARING PROTECTION

Snugs Vs. Disposable Foam ear plugs

Snugs supply a superior PPE hearing protection product to 3M's foam ear plugs. The 5 key advantages are:

1. Cheaper than foam plugs after 9 months of use
2. Re-useable equates to 90% less environmental waste
3. Higher Noise Blocking compliance through improved comfort
4. Improved hygiene ensures less worker days off through ear infection
5. Decreases employer's liability risk, improving employees health & wellbeing

SNUGSSHIELD WORK

Snugs hearing protection range provide solutions for all noisy environments. With different custom fit methods available, we are able to supply your workforce to suit their particular requirements.

Snugs Shield Work is customised attenuated hearing protection made from a medical grade, hypoallergenic soft silicone, offering the. highest level of comfort. Rated in the USA at 26 dB NRR, equivalent EU/UK Rating of 33 db SNR

Its optimal attenuation improves speech intelligibility and makes warning signals even more apparent.

Employees are therefore extremely motivated to wear Snugs hearing protectors throughout the working day without interruption.

Benefits:

- ✓ Cheaper than 3M Foam ear-plugs in first year. No cost in subsequent years
- ✓ 90% less Environmental Waste than disposable Foam Ear-plugs
- ✓ More Compliant through 100% usage
- ✓ Attenuated filters to allow good work sound and warning signal perception
- ✓ Customised fit improves employee acceptance and willingness to wear ear PPE, ensuring 100% compliance
- ✓ Flush, discreet fit in the ear to avoid being knocked out of place
- ✓ Handle for hygienic insertion into ear and easy removal
- ✓ Lanyard that pops-off under stress or entanglement
- ✓ Ballistic Carry case with Belt hook

SNUGSSHIELD COMMS

In-Ear Custom-Fitted Communications & Hearing Protection

One Ear: Communicate via Acoustic Airline Tube connected to your RF Radio.

Other Ear: 27dB SNR Attenuated Hearing Protection.

SnugsShield Comms enables you to work comfortably and safely in a noisy environment. The Acoustic Airline Tube is a completely passive component, devoid of electronics.

Employees often remove their earplugs or ear defenders 'briefly' in order to communicate. During those few minutes when employees go unprotected, the risk of hearing damage increases significantly.

The Comms Tube enables you to listen to radio communication whilst protecting your hearing from dangerous, loud and annoying noises.

Benefits:

- ✓ Custom fit for maximum comfort
- ✓ Hearing protectors also aid communication
- ✓ Improved speech intelligibility
- ✓ Easy to insert, remove and maintain

SNUGSSHIELD FOOD

In-Ear Custom-Fitted 27dB SNR Attenuated Hearing Protection made in the innovative material Biopor® AB Xtrack, which offers the possibility of detection, X-ray recognition and is certified as PPE for the food industry.

Snugs Shield Food meets the strict requirements for safety and hygiene in the context of quality control within the food production industry.

Made from a special detectable material, they ensure food hygiene compliance whilst offering the user the highest level of in-ear comfort. The attenuated filters ensure communication is possible, without the need to remove hearing protection throughout the work shift.

With 100% compliance in use, this means employees ears are protected 100% of the time

Benefits:

- ✔ All materials are detectable to prevent contamination of foods
- ✔ Only available in Blue to meet industry standards
- ✔ Bespoke fit for maximum comfort and compliance in use
- ✔ Easy to insert, remove and clean to ensure hygienic use

THE FITTING PROCESS

We offer two different fitting methods to make Snugs Shield hearing protection. Both ensure you are supplied with a certified product which comfortably protects your employees ears.

On-Site Fit

Snugs team of ear care specialists visit on-site to take precision moulds of employees ears

Ear impressions are scanned to create individual 3D ear files for employees.

Request a quote

Self Fit

Snugs supply fitting cards for employees to take and submit their ear pictures through our web-based App

Snugs patented AI measures and matches ears to our 3D database to find the perfect fit

TRUSTED BY

Snugs have successfully fitted Snugs Shield custom fit hearing protection for a number of corporations in both the UK and USA

Framatome, leading contractor at Hinkley Point C, were surprised by the care their workers took of their Snugs earplugs; especially the ease of use and cleaning. Their lead Health & Safety stated "I have only had good feedback from our workers, who are happy to keep their Snugs in throughout the day"
