## *Women's Bracelet Size Guide*

1. Using a flexible measuring tape\*, measure the circumference of your wrist just above the wrist bone (toward the elbow).
2. Make a note of the number at the point where the measuring tape meets the 0.
3. Compare your measurement to the chart below, and choose the corresponding bracelet size. If your wrist appears to be between two sizes, we suggest you choose the larger size.

| <b>Wrist Size<br/>(Inches)</b> | <b>Wrist Size<br/>(CM)</b> | <b>Bracelet<br/>Size</b> |
|--------------------------------|----------------------------|--------------------------|
| 5.5–6"                         | 14.0–15.2                  | Small                    |
| 6–6.5                          | 15.2–16.5                  | Medium                   |
| 6.5–7"                         | 16.5–17.8                  | Large                    |
| 7–7.5"                         | 17.8–19.0                  | X-Large                  |

\*If you do not have a flexible measuring tape, use a strip of paper, ribbon, or string and mark it where it overlaps on your wrist. Then measure the length against a ruler.
