

Trellis Enquiry Form

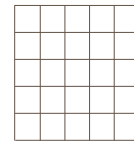

Every trellis is made to measure to fit the garden space exactly, so please provide the following information...

YOUR TRELLIS DETAILS

1. Decide whether you want an open or a closed trellis. An open trellis has 40mm balls on the ends, whereas a closed trellis is a grid. The bars are 12mm diameter mild steel.

Open

Closed

2. How is it going to be installed?

If free-standing the trellis will need 75 x 75mm steel posts at each end, postcreted into the ground to a depth of 30-60cm. Steel tabs on the posts bolt to the trellis. Allow 120mm at each end for the post and tab.

Entirely wall-mounted

Wall-mounted with legs into ground

Free-standing

3. What size do you need?

If it is ground-mounted add 30cm to the height to go below ground

Height: cm

Width: cm

4. What distance from the wall do you want the trellis? Our welded brackets are normally 10cm long, but they can be any length you specify

Standard bracket: 10cm

Custom bracket: cm

5. How many bars would you like?

Number of verticals:

Number of horizontals:
