2016-2023 Toyota Tacoma TRD PRO Style Front Grille w/ LED Off-Road Lights - Wiring Instructions:

There are 3 wires in total: black wire, red wire and yellow wire.

You can choose the connection method by yourself, and the black wire needs to be connected to the negative pole.

Method 1: Connect the yellow wire to ACC and the red wire to Headlight. This effect is that when power is on, the amber light will light up. When the headlights are turned on, the off-road lights are on.

Method 2: Connect the yellow wire to Headlight, and the red wire to ACC. The effect of this is that when power on, the off-road lights are on. When the headlights are on, the amber light is on.

The above two wiring methods are selected according to your personal preference.
