

Felt Mushroom Pattern

For the Mushroom Cap:

Cut a triangle from each quadrant of the circle.

To give the mushroom a taller dome (and smaller circumference) make the triangles wider.

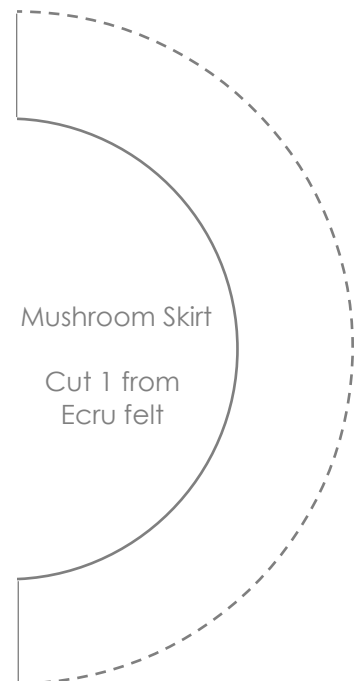

To give the mushroom a flatter dome (and larger circumference) make the triangles narrower.

For the Mushroom Stem:

Cut (1) 6 x 2 1/2" rectangle from Seaside felt.

Roll along the short side until the diameter of the stem is roughly the same diameter as the hole in the Base. Trim the extra length.

For the Mushroom Skirt:

The skirt will not need to be this long, but, as the diameter of the stem may vary, use this to start and trim as needed.

For added embellishment, use a decorative scissor to cut along the dashed line.
