

# Chirp-edge Overview

## Security without barriers

Chirp-edge works in a similar way to regular floor-mounted EAS antennas, but it just requires a tiny 14 cm cubed Hub to be installed above or near the store exit. The system is simple to install, takes up no space at all, and can be up and running in minutes. Chirp-edge is a cost effective retail security solution and is backed by our 30 day money back guarantee.

### How it works

The Chirp-edge system consists of 3 key components:

#### 1 The Tags

To protect the products

#### 2 The Hub

Is the antenna

#### 3 The Deactivator

Deactivates the Tags

No big, unsightly EAS gates to install at the exit

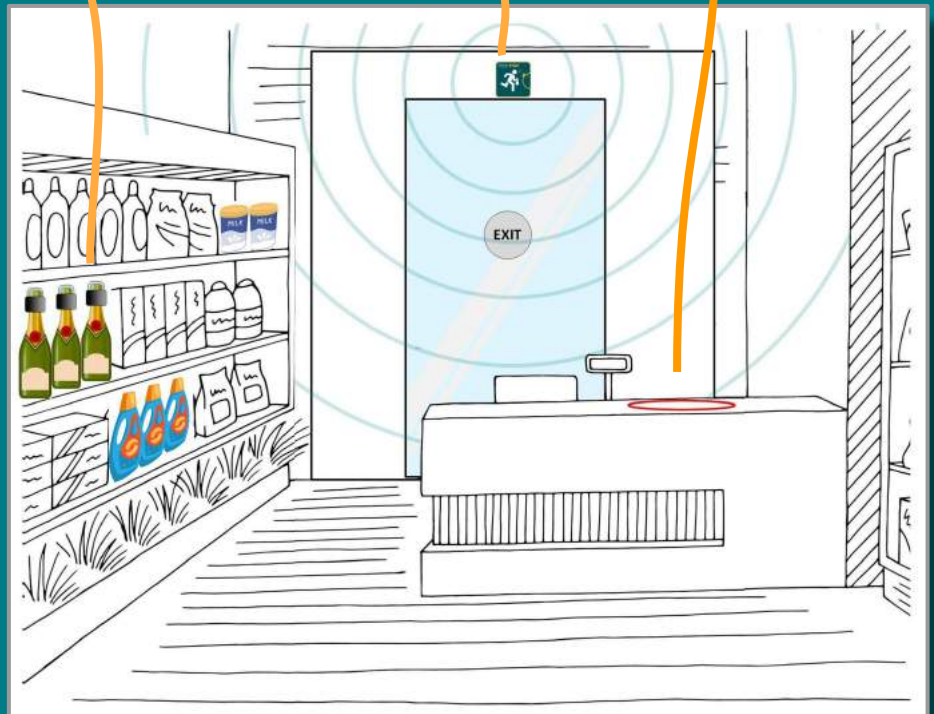

Very easy to install; can be set up in minutes

Just requires 2x 240v plug sockets: one for the Hub and one for the Deactivator

Unique 30 day money back guarantee with our no nonsense return policy.

## How it works ... in a little more detail

The Hub is very easy to install and only requires a 240v power socket nearby. Unlike regular EAS systems there are no gates, just this small Hub.

Each Hub emits a signal of up to 3m radius and this can be adjusted to suit your environment using a simple dial on the side of the Hub. If your exit is wider than 3m then simply add more Hubs to expand the width. You just need to ensure the signal from each Hub overlaps.

The system includes a small Deactivator that deactivates the Tags, allowing them to be removed from the product. This small device can either sit on top or underneath your counter.

Currently there are four types of Tag in the Chirp-edge range:

Lanyard Tag

Surface Tag

Wrap Tag

Bottle Tag

The Chirp-edge system is so straightforward to set up that it is the only EAS security solution on the market that can easily be trialed. We offer Trial Packs that allow you to evaluate the system in your store, and then it's easy to add additional Tags or Hubs as you need to. If for any reason the system does not meet your requirements, simply return it under our 30 day money back guarantee\*\*.

To find out more about our Trial Packs visit:
