Arava has invested a great deal to study the research, development, and clinical trials pertaining to the healing effects minerals have on the skin. Clinical trials that were independently authorized and published in scientific journals prove the invigorating effects that minerals and plant-based products have on a wide variety of skin and hair problems.

An important part of the company's mission is to learn about and apply the research and development findings, which are based on four main areas:

Veterinary research

Lengthy longitudinal studies about skin and fur problems in animals in general and pets in particular, and the harmful effects of chemical substances in the various treatments in general and the irreversible damages of pesticides in particular.

Basic research

To improve our understanding of how minerals work, and their contribution to improved function, texture and appearance of the skin and the immense impact they have on fur health.

The application

of numerous botanical studies in order to get maximal physical and curative benefits out of the various components in essential oils, base oils and extracts.

Developing

spa and therapeutical treatment products focusing on diverse technologies to rejuvenate the skin and fur and to slow aging, which have become an inseparable part of Arava's variety of products.

Arava develops and manufactures pet products, and it is the only one in its field found in its natural environment – the Dead Sea. Arava works toward exposing the secret of how minerals have a rejuvenating effect on skin and fur. Our scientific approach helps us attain unrivaled expertise in the field. Moreover, we have translated our in-depth knowledge base into a superior product line for skin and fur care, based strictly on the rich natural treasures of this enchanted area and on the oils and extracts produced from plants and trees that grow all over the world.

Arava's second objective is to learn the rich language of fur and skin. As living organs, they receive information and stimuli from the external world and communicate with it via responses that help them protect, treat and clean themselves, to maintain their moisture levels, and to combat aging. Minerals have an exceptional ability to act as "intercellular messengers" that transmit information and positively influence health and essential activity.

At Arava, we are committed to continue to learn and apply the wonders of this important biological phenomenon in our efforts to create the best pet products in the world based on Dead Sea minerals.

Skin & Coat Sensitive Care

About

The Dead Sea contains 26 essential minerals. Twelve of these are found in no other sea or ocean and some are recognized for imparting a relaxed feeling, nourishing the skin, activating the circulatory systems and for easing rheumatic discomfort and metabolic disorders.

The rich, natural minerals are all essential for healthy skin. They help the skin to renew and regenerate cells. Dead Sea salt acts as a disinfectant and help in removing harmful substances from the skin. Dead Sea Mud stimulates blood circulation. The rich minerals and the mud tightening action promote circulation by increasing the supply of oxygen to the skin and removing the toxins from it, thus toning and firming up skin tissues, leaving the skin glowing and youthful looking. Dead Sea Mud exfoliates dead skin cells. The fine, natural grain of the mud softly yet effectively sloughs off dead skin cells, leaves the skin looking fresh and radiant. Dead Sea Mud with all its rich Dead Sea Minerals is ideal for relieving skin ailments in odd places on the body.

Sulphur:

Helps to disinfect the skin

Sodium

Remove skin scales and improve its permeability, bind the water and generate a feeling of suppleness

Magnesium

Essential for cell metabolism, affects the ripening of skin cells of psoriasis patients, and works as anti-allergic agent.

Potassium

Potassium improves the oxidation and regulates the electrical process of the muscles and the nervous system.

Bromide

Have a very relaxing effect.

Bitumen

Acts as an anti-inflammatory agent.

Chlorine

Chlorine necessary to maintain the correct balance of alkaline and acid in the body, together with being vital for cell metabolism.

Iodine

Iodine is necessary for the production of the hormone thyroxin, and is also vital for both energy and cell metabolism.

Calcium

Necessary in strengthening cell membranes and cleansing the pores. In addition it is vital for production and maintenance of healthy bones, together with regulating the heart muscles and nerves.

Zinc

Plays a role in enzymatic regulation of cell proliferation

Phosphorus

Important and essential for all proper functioning of the skin system starting from creation of energy for the cells, the metabolic process and principally the capacity for self-repair of cells damaged because of external aggressions.

Lithium

Relieves skin diseases such as psoriasis, helps to prolong cell life and maintains the nervous system health in the short and the long-term

Boron

Helps to channel the hormone functions in the skin, particularly estrogen and testosterone. A boron deficiency weakens the cell membranes

Strontium

Has effective properties for prevention of itchiness, reduces signs of skin irritations and inflammation.

Iron

Essential for the organic compound construction which enable carrying oxygen by the red blood cell. Also iron is used to store oxygen in cell tissue.

4 pipettes

Code: 7290013192219

About

Highly effective natural formula, compounded from 15 essential oils of trees and plants which have developed the most effective defense mechanism that nature has created against harmful insects. It treats dogs which are infested by fleas and ticks, while providing quick relief from insect bites

Botanical Flea & Ticks Advanced Treatment

Free of Chemical Pesticides

For Dogs up to 20 Lbs. (9 Kg.)

Active ingredients

Peppermint, Pelargonium Cinnamon, Lemongrass, Clove, Thyme, Neem, Eucalyptus Lemon, Eastern Red Cedar, Catnip, Feverfew, Pine, Orange, Bay, Rue, Rosemary, Dead Sea minerals.

Directions for Use

Shake well before use. Separate the fur at the base of the skull to reveal the skin. Place the dropper tip on the skin and press gently, subsequently repeat the same way along the spine up to the tail. Put some drops on your finger tips or on tissue and spread into the inner ears. Put a few drops on the abdominal area and massage. For best results it is highly recommended to wash the dog two days before the advanced F.T.L treatment with ARAVA F.T.L Botanical Shampoo only. This product can be used as part of the ARAVA F.T.L treatment strategy.
