6x1.4"	1"	8mm	MCAG6BB	59.95

Technician Notes

Three-spoke ultralight aluminum caster wheels.

Custom-made 6061-T6 aircraft grade aluminum wheel that is machine-lathed for a perfect balance.

Priority, highly-resilient solid urethane tread is designed to minimize energy loss and absorb vibration.

Spherical arched-tread design improves pivotability for effortless turns and enhanced stability.

Extra width better distributes downward pressure allowing the wheel to maintain higher flotation and significantly reduces immersion into carpet, gravel, etc.

Technician Notes

Same great benefits of traditional Frog Legs wheels but specially designed for Ti-Lite wheels

Technician Notes

An economic alternative made with composite. Still with all the benefits of the Frog Legs wheel design.

Frog Legs and Skate Wheels

Blue Aluminum Lightweight Rim With Poly Tire

SIZE			Product Number	MSRP
