

Versapak Secure, Reusable and Recyclable Products

Versapak pouches and carriers can be used over 2,000 times. The durability of the material used and the added quality of the design and manufacturing has proven that Versapak products can be reused over and over providing a cost-effective and environmentally friendly alternative to single-use envelopes.

Every Versapak pouch, wallet and carrier comes with a 5-year guarantee. Versapak products are manufactured using strong, durable materials which means that if in the unlikely event your pouch or carrier suffers a manufacturing fault outside of the normal wear-and-tear, Versapak will happily repair or replace your faulty items.

Versapak T2 Seals

Used to seal Versapak pouches and carriers to ensure that the contents remain tamper evident.

Made from Recycled Plastic

Our state of the art moulding machines melt down reclaimed, recycled material and reprocess it to make our T2 Seals.

100% Recyclable

Versapak T2 seals can be recycled in exactly the same way as any other recyclable waste.

Versapak Recycle Your Seals Scheme

We offer a free of charge service to take back your used T2 Security Seals to be recycled.

Versapak Pouches and Carriers help save our planet and save you money

Save the Planet

If you use 1 regular-sized, single-use polythene bag every day for 5 years that would be enough to fill the ground of an entire football pitch.

Using one Versapak bag over its lifetime is the equivalent to using approx. 20kg single use plastic bags.*

**Based on the use of a Versapak product exceeding 2,000 uses in comparison to a 10g weight equivalent traditional single-use bag.*

Save Money

A customer may have a requirement to move items between office locations, which demanded a single-use bag each way (5p each way costing 10p in total).

Comparatively, the Versapak solution at a one off cost of £10 would achieve a cost recovery at just 200 uses compared to a traditional envelope. With a lifetime of over 2,000 uses, Versapak bags and pouches are extremely cost effective!

Versapak Recycle Your Seals Scheme

7,000 security seals is equivalent to an average car tyre heading for landfill.

We operate a return and recycle scheme for used plastic seals. We take back all used Versapak security seals and regrind them to make new ones.

Help us to reduce plastic waste in 5 simple steps:

1. Contact us today
2. We send you a free collecting bag
3. Put your used seals in the bag
4. Return the bag to us (freepost)
5. We recycle the seals and return the bag to you

Recycle your Versapak Scheme

At Versapak, reducing waste is really important to us, so we use our surplus material to make pencil cases. We work closely with charities, schools and food banks to distribute the pencil cases to less fortunate children.

We also take back Versapak bags that have come to the end of their use, and repurpose the material to make groundsheets for the homeless. Where possible we donate used pouches and carriers to charity.

The Planet Mark

Versapak is proud to have been certified by The Planet Mark and the Eden Project since 2019.

This certification highlights our aim to measure, monitor and reduce our carbon footprint, and proves our commitment to environmental sustainability.

The Planet Mark recognises outstanding achievements and commitment to continuous improvement in sustainability. It measures a business's carbon footprint and encourages reduction on an annual basis. Only those companies that can show reduction year-on-year are awarded this accolade.

Versapak believes in ethical manufacturing and reusable products

- Versapak pouches and carriers are reusable over 2,000 times.
- Energy Efficient Injection Moulding Machines that manufacture our security seals.
- Versapak Security Seals are 100% recyclable.
- Versapak locking mechanism Security Seals are made from recycled plastic.
- Recycle Your Seals Scheme - send us back your used Versapak seals and we will grind them down to make new ones.
- Recycle your Versapak Scheme - we use scrap material and surplus pouches and carriers and re-purposes the material.

Business Improvements

Versapak recognises that our employees can make the biggest improvements in our sustainability efforts. We encourage all members of our team to scrutinise all business functions that impact the environment, and always strive to reduce emissions associated with our business.

PlanetMark

Protecting our rainforests is one of our best lines of defence against climate change.

As a result of our commitment to The Planet Mark, we are supporting Cool Earth a charity which is helping rainforest communities to protect nearly 100,000 hectares of biodiversity rich rainforest across three continents.

Behind this huge milestone are thousands of families whose futures have been transformed.

Targets for Next Year:
