

The Red Bag Scheme

Tamper Evident Outpatient Bag

The Red Bag Pathway Scheme reduces the strain on medical services by minimising the time taken for ambulance transfers, A&E assessments and reduces the number of avoidable hospital admissions. It is also designed to fulfil the requirements of the NICE guideline NG27.

The Versapak Red Bag is a high quality, hard-wearing, durable bag for holding standardised medical information, medication, and the personal property of individuals when they are being transferred between their care home and a hospital.

The Red Bag is fitted with a tamper evident locking mechanism which, when fastened using a T2 security seal ensures that the contents of the bag remain secure. This means that care home personnel and emergency services staff can rest assured that the bag is complete with all the items, and ready to be taken to the hospital.

Reusable over
2000 times

5 year
Guarantee

Versapak and the NHS working together

“Thanks to Versapak, we have been able to promote the Red Bag Pathway at event stalls in hospitals within our borough. Versapak has been invaluable, supporting our work and communicating across our organisation.”

Stephanie Watts,
Commissioning Manager for South East London CCG

We can custom make a carrier to suit your exact requirements without large minimum order quantities or lengthy lead times. Enquire now for more information.
