Terms:

1. Please ensure all returned units are cleaned and free from dirt. Any returns found not clean will be sat in quarantine until collected. As this poses a hygiene threat to our staff.
2. Ensure your inbound delivery is tracking, insured and delivered with a reputable courier, as lost or damaged units will not be Apexio Industrial's responsibility on any loss or damages.
3. Ensure correct name and address is filled out, as we have no liability on miss or incorrect information provided.
4. If your unit is found damaged, faulty or requires a full recalibration, a further charge for repair, re-calibrating is quoted and supplied to you to pay before work commences. The standard calibration services is only to check that the unit meets the accuracy of the unit. Re-calibration is a configurable process that is priced at \$30 per unit, if we are able to complete the work, depending on condition and other factors.
5. The gas calibration service only covers testing against know variable gases to check the accuracy statement of the device.
6. The temperature calibration only covers 3 or 5 point set point of temperatures between -20 and +650°C
7. The pressure calibration only covers pressure range between 0-700 Bar
